

ALOS

K&C Initiative
An international science collaboration led by JAXA

K&C Initiative, Extension Phase 2009-2011: Mapping and monitoring of forests in Sweden using ALOS PALSAR data

Johan Fransson and Håkan Olsson

Swedish University of Agricultural Sciences, Sweden

Leif Eriksson and Lars Ulander

Chalmers University of Technology, Sweden

Maurizio Santoro

GAMMA Remote Sensing, Switzerland

Introduction

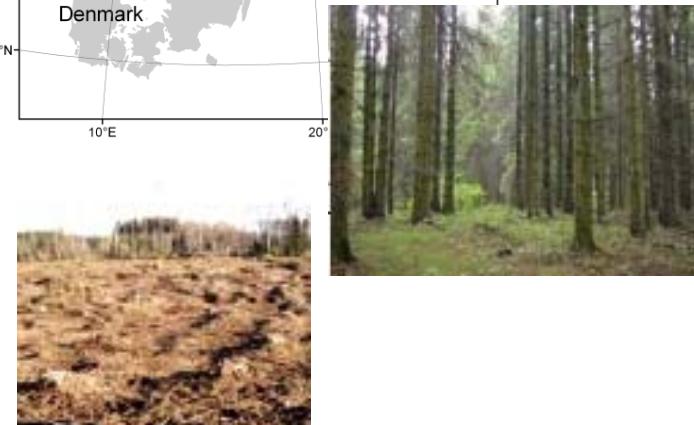

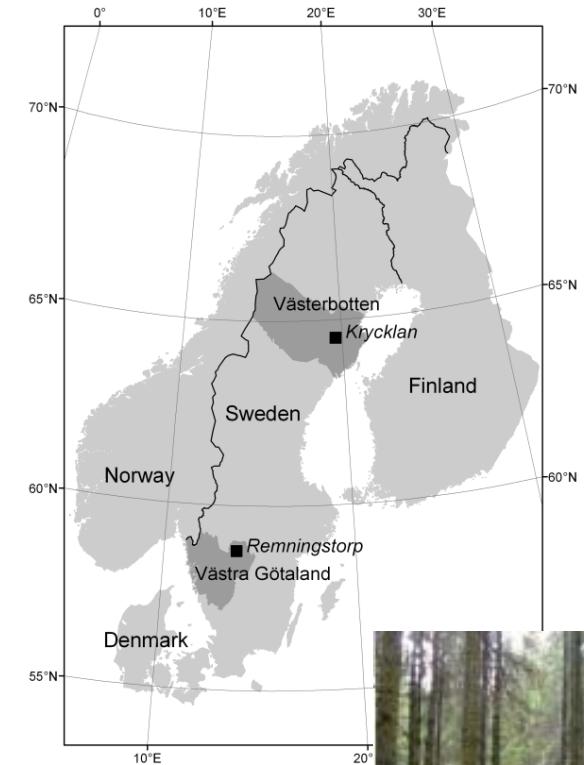

Project objective:

To further develop and evaluate methods for large-scale mapping and monitoring of clear-cuts and possibly also stem volume or biomass for the entire Sweden using ALOS PALSAR data

Project region:

Sweden

NOTE: Sweden + Norway + Finland would be nicer in view of targeting a geographic region but logically not practical at the moment → PALSAR data are delivered though for this area

Johan Fransson, Andreas Pantze and Håkan Olsson, SLU, Sweden
Leif Eriksson and Lars Ulander, Chalmers University of Technology, Sweden
Maurizio Santoro, GAMMA Remote Sensing, Switzerland

 GAMMA REMOTE SENSING

Schedule

The objective will be achieved by refining the developed methodology and algorithms in Phase 1 and by performing a scientific evaluation of clear-cut detection and possibly biomass estimation of Sweden

- Refinement of the developed **methodology** in Phase 1 (2009) - ONGOING
- Refinement of the **processing chain** developed in Phase 1 (2009) - COMPLETED
- Adaptation of **processing chain** from regional (for biomass estimation from local) to national scale mapping (2010) - ONGOING
- Up-scaling and testing of **methodology for change detection** (and biomass estimation) (2010)
- Production of clear-cut (and biomass) maps (2010)
- Final delivery of the product with a written report to JAXA (2011)

Johan Fransson, Andreas Pantze and Håkan Olsson, SLU, Sweden

Leif Eriksson and Lars Ulander, Chalmers University of Technology, Sweden

Maurizio Santoro, GAMMA Remote Sensing, Switzerland

 GAMMA REMOTE SENSING

Schedule – some more details

- Funding has been granted for 2010-2011 by the Swedish National Space Board
- One Ph.D. student full-time employed at SLU since Jan. 2009
- Clear-cut detection method of Phase 1 used as basis for more advanced method in order to improve clear-cut delineation
- Reference data for accuracy assessment being sought at different locations
- Pursuing biomass estimation is yet unclear if feasible within the timeframe of the extension

Deliverables

- No pending deliverables from Phase 1 (← clear-cut maps of prototype areas delivered during this meeting)
- The deliverable of the extension will be a clear-cut map (and possibly also a biomass map) covering the entire Sweden with an estimate of the product accuracy

Johan Fransson, Andreas Pantze and Håkan Olsson, SLU, Sweden
Leif Eriksson and Lars Ulander, Chalmers University of Technology, Sweden
Maurizio Santoro, GAMMA Remote Sensing, Switzerland
