## Long Term Goal

### Context

- Brazil has stated that It will reduce its Green House Gas emission by circa 40% by 2020 by, among others actions, reducing deforestation in the Amazon by 80% in relation to 1996-2005 baseline ( $19,500 \text{ km}^2$ ) and by 40% in the Cerrado (neotropical savanna)
- Goal :
  - To include PALSAR and (its successors...) large scale products into deforestation monitoring and controlling system
