## Comparison of TRMM V7 3A25 with Singapore rain-gage network

## data

June 3, 2011
Toshiaki Kozu, Shimane Univ., Naofumi Yoshida, JAXA/EORC

- TRMM version 7 (OAT) 3A25 G1 monthly rainfall shows good correlation with Singapore MSS rain gage network derived one with some underestimation (~11~18\%).

## Singapore as a TRMM GV site

- RG used for TRMM comparison

## 3A25G1 and 3B43 grid areas for Singapore

3B43(v5) derived rainfall near Singapore
SG (103-104 ${ }^{\circ}$ E, $1-2^{\circ} \mathrm{N}$ )
$5^{\circ} \times 5^{\circ}\left(100-105^{\circ} \mathrm{E}, 0-5^{\circ} \mathrm{N}\right)$
This suggests that 3A25G1 ( $5^{\circ} \times 5^{\circ}$ ) can be compared with SG raingage data.

Singapore and $5 \times 5$ deg rainfall near SG from 3b43

## Comparison of SG RG and 3A25G1 monthly rainfalls (V7 OAT)

V7 OAT 3A25 Monthly rainfall [mm/month]

## Mean monthly rainfalls and ratio with SG RG Feb. 1999 - Feb. 2002

| SG Raingage <br> average | rainMean1@ <br> 2km | surfRainMean <br> 1 | E_surfRainMe <br> an1 | V6rainMean1 <br> $@ 2 \mathrm{~km}$ |
| :---: | :---: | :---: | :---: | :---: |
| 208.0 mm | 177.4 mm | 182.7 mm | 170.8 mm | 169.2 mm |
| 1 | 0.85 | 0.89 | 0.82 | 0.81 |

Correlations between SG gage with PR V7 OAT 3A25 between Feb. 1999 and Feb. 2002 (excluding Aug. 2001)

## Comparison of PR V6 vs. V7 OAT near SG

## Thank You

## 3B43 rainfall at Singapore and North, West regions

3B43 estimates slightly smaller rainfall in rainy, and larger rainfall in dry seasons in north-west regions.

Singapore and its westside rainfall

$$
\text { comparison, Jan. } 98 \text { - May } 02
$$

## Relative differences between SG RG and 3A25G1 and 3B31 monthly rainfalls (Ver.5)

Relative differences between SG gage and TRMM v5 products

Good correlation is found between "errors" of PR and TMI rainfall estimates. --> Sampling error dominant? ${ }_{11}$
