Change of SAR attenuator setting for ScanSAR HV mode

JAXA EORC & ALOS-2 Project Team

- It was found that the ScanSAR HV-polarization images sometimes became dark and blurred over ocean and coastal regions.
- The cause of this issue was that the onboard ATT (attenuator) setting for ScanSAR cross-polarization was higher.
- On April 11, 2018, the ATT setting for ScanSAR cross-polarization was changed to 20 dB.
