

## Recommendations

- Super Sites – dedicated access to SS time-series required.
- [Gamma] Low resolution (50-250m) FBD “mosaics per cycle”
- [SLU] North Europe LOW PRIO during World C (May) and World E (Aug). At least World E (Aug) should be TOP PRIO
- [CSIR] Southern Africa – should be timed to ....(swap March for jul or Aug)
- [IBAMA] Only having the ScanSAR scene where JJFAST polygon is detected not sufficient. Full time-series desired (at least one observation before)
- For JAXA to investigate alternative options to address processing bottleneck
- For JAXA to investigate alternative options to address download speed for mosaics
- ScanSAR mosaics to be generated every cycle also after March 2018uc

## Post K&C

- Annual meetings
- Data allocation – 75 or 100 scenes?...
- Advisory role
- Travel support
- 4 days mtg
- In case travel support cannot be provided, possibly rotating hosting of meetings
  
- All KC members to submit proposals to the open EO RA2 which will be released mid 2018
