Status and Capacity Issues

M. Shimada

JAXA/EORC

KC18@RESTEC

Nov. 7, 2012

General

- RA-4
- Pi-SAR-L2
- Indonesian Campaign
- ALOS-2: In preparation, CVST-2, next week in Tsukuba
- REDD+ project in JAXA running

ALOS/PALSAR Product Status

- 25-m mosaic-2007-2010: completed

- 50-m mosaic: Done

- 100-m mosaic: in progress

- FNF: updating through the visual comparison with optical image (target Nov. End)

- Negotiation Process with commercial users for opening the mosaic products

- ScanSAR Mosaic: 100m resolution 2007-2010

Strip Data processing

- In KC-3, there are four possible data provisions, i.e.,
- 1) 25m mosaic data and FNF products,
- 2) 25m strip data (2x4:=36m, 2:20m FBD),
- 3) standard products,
- 4) ScanSAR mosaic
- Main data source is 1)
- WRT 2), data productions are limited with 1000 per year. 4~5 PI's are requesting 2).
- JAXA will spend two years to satisfy the PI's requests.

KC training Course

- We have conducted the KC training course twice at KC17 and KC18.

- KC17: LULUCF course using Sub Space method

- KC18: Gamma-zero Change and LULUCF course
