NDX-2021020

IAXA

Final Report on the 6th ALOS-2 Research Announcement

March 2022

Japan Aerospace Exploration Agency (JAXA) Earth Observation Research Center (EORC)

Table of Contents

1 Monitoring to predict natural disasters and to grasp its damage situations
Moment and Strain Accumulation Rate along the Northern San Andreas Fault System from InSAR and GPS PI No.3071 David T. Sandwell
Utilizing PALSAR-2 Data to Investigate Postseismic Mantle Relaxation following ~M≥7 Earthquakes
InSAR Investigation of the World's Most Rapidly Slipping Low Angle Normal Fault: the Mai'iu Fault in southeastern Papua New
PI No.3121 Ian James Hamling
Investigation into the distribution of Slow Slip along the Hikurangi subduction interface, New Zealand PI No.3122 Ian James Hamling
DETECTION OF SLOW MOVEMENT AREAS IN THE FOREST AREA USING THE TIME SERIES L-BAND SAR
INTERFEROMETRY
Adaptive imaging of high-resolution PolInSAR data based on high-dimensional complex-valued neural networks for natural-hazard
PI No.3133 Akira Hirose
Monitoring mine subsidence in Midwestern United States using InSAR and numeric modeling
Detection of the steady crustal deformation due to plate coupling using InSAR
Toward 4-D observations of seismic and volcanic deformation
Spatiotemporal characteristics of the surface creep along the East Anatolian Fault deduced from InSAR and GPS 4 PI No.3152 Ziyadin ÇAKIR
Monitoring volcano-deformation in the Eastern Caribbean combining the existing GPS network and ALOS/ALOS-2 data 4 PI No.3153 Graham Alexander Ryan
ALOS-2 geodetic measurements of the subduction zone in Mexico: implications to large earthquakes and seismic hazard
Exploring effects of fault bends on the seismic propagation from ALOS-1/2 SAR observations
A Study of predictive monitoring technique of landslides with ALOS-2 time series InSAR PI No.3183 Daisuke Sango
Resolving relationship between aseismic slip and earthquake rupture dynamics by Small Baseline PS-InSAR and inversion modeling
for the Alborz and Zagros fault zone, Iran 7 PI No.3194 Zhe Su
Subsiding deltas, sinking cities and the threat of sea-level rise to megacities in Asia

Using ALOS-2 SAR interferometry to detect and monitor deep-seated gravitational slope deformations (DSGSD) in Taiwan
Glacier hazard studies in the Asian high mountains
PI No.3215 Chiyuki Narama
Image the characteristics of spatial-temporal evolution and mechanism of land subsidence and ground fissures over Xi'an 101 PI No.3222 Chaoying Zhao
Automatic Detection and Early Warning of Landside Hazard in South Asia using ALOS-2 PALSAR-2 data
Monitoring the Large-Scale Landslides along the Longmenshan Faulting System in Sichuan (China) by Developing the PS-DS
InSAR Technique Based on ALOS-2/PALSAR-2 Images
PI No.3231 Guoxiang Liu
Use of multitemporal InSAR data to develop geohazard scenarios for Bandung, Western Java, Indonesia
Validation of active deformation along Taiwan collisional orogenic belt by ALOS-2, Sentinel-1 and continuous GPS
measurements
PI No.3255 Jyr-Ching HU
Large gradient and three dimensional mining-induced deformation monitoring with multiple SAR datasets
Coherence analysis for mountain hazards using PALSAR-2 data
PI No.3263 Hiroto NAGAI
Oil Spill Response and Characterization with Multi-polarization ALOS-2/PALSAR-2 ······ 137 PI No.3265 Cathleen E. Jones
A study combing landslide and debris transport relation base on differential interferometric radar technique
SATELLITE ANALYSIS FOR WILDFIRE BURNT AREA BY PALSAR-2 BASED ON FIRE RESIDUAL OBSERVATION OF
BURNT TREES
Monitoring of active volcanoes in Japan with PALSAR-2: from small displacements measurement to modelling and forecast 157 PI No.3320 Paolo Pasquali
Satellite-borne InSAR Monitoring for Risk Management of Infrastructure Damage Risk due to Landslide Activity
Validating interpretations of ALOS-2 data for the 2015 M8.3 Chile earthquake: Calibration of co-seismic and post-seismic
deformation and assessment of transient seismic hazard
PI No.3357 Tung, Sui
Monitoring of Earthquake Cycle under the constrain of Space Geodesy (GPS, InSAR)
Crustal and cryogenic deformation monitoring in Siberia (Baikal rift, Kuznetsk coal basin) and Siberian Arctic (Yakutia, Yamal) with
PALSAR-2 and TanDEM-X interferometry
PI No.3402 Tumen Chimitdorzhiev

Understanding deformation through earthquake cycle in the Himalayan Arc
Application of the PALSAR-2 Along Track Interferometry to the water coverage estimation PI No.3406 Masanobu Shimada
2 Ecological systems monitoring including agriculture
Spatio-temporal monitoring of forest bio-physical parameters using ALOS-2 full polarimetric InSAR measurements
Testing the utility of L-band SAR to estimate changes in forest biomass due to forest degradation
Advanced cryosphere monitoring at the Sonnblick Observatory (Austria) within the framework of Global Cryosphere Watch
PI No.3068 Annett Bartsch
Extraction of Forest Underlying Topography from L-band PolInSAR Data
Multiple monitoring of plant distribution and biomass of terrestrial ecosystem by satellite and ground observations
Multi-Temporal Polarimetric ALOS-2 Imagery for Dryland Crop Mapping
ALOS-2 SAR and PolSAR mapping technologies for monitoring and managing coastal ecosystem and responding to disasters
22 PI No.3354 Elijah Ramsey III
3 Civil infrastructures monitoring
Study on monitoring road bridges deterioration using SAR data
THE DETECTION AND MONITORING OF LANDSLIDES IN CHINA USING LONG-WAVELENGTH ALOS/PALSAR-2 SAR
$\mathbf{D} \mathbf{U} \in \mathcal{O} \square \mathcal{O} \square \mathcal{D} = \mathcal{O} \square \mathcal{U} \cap \mathcal{O} \square \mathcal{O} \cap \mathcal{O} \square \mathcalO \cap \mathcal{O} \square \mathcalO \cap \mathcalO$
IMAGES BASED ON SAR/INSAR METHODS
IMAGES BASED ON SAR/INSAR METHODS 23 PI No.3247 Chaoying Zhao 23 Subsidence in Coastal Areas and the Impact to Flood Protection Infrastructure 23 PI No.3266 Cathleen E. Jones 23 Surface deformations on Baikal rift system and its surroundings; estimation using radar interferometry 23 PI No.3299 Marina A. Lebedeva 23 Continuous multi-band InSAR deformation monitoring by means of near real-time analysis: A case study in monitoring of underground gas storage facilities in Gajary-Baden and Velke Kapusany, Slovakia 24 PI No.3318 Juraj Papco 24

4 Sensor calibration 25	51
Geometric and Interferometric CALVAL of ALOS-2 PALSAR-2	52
PI No.3118 David T. Sandwell	
Polarimetric calibration/validation of ALOS2/PALSAR2 -part225	56
PI No.3151 Toshifumi Moriyama	
Application of point and distributed targets for DALSAD 2 radiometric collibration	
Application of point and distributed targets for FALSAR-2 radiometric canoration	00
Estimation and compensation of ionospheric contribution to InSAR observation	'2
5 Disaster and earthquake	17
Interseismic Strain Accumulation Across the Zemuhe-daliangshan Fault Zone (Western Sichuan Province, China) from InSAR and	
GPS observation 27	18
PI No.3001 X1aogang Song	
Analysis of ground deformation associated with recent induced seismicity in Oklahoma, US	33
PI No.3007 Gidon Baer	
Land subsidence measurement in Karamay city Using ALOS/PALSAR data	36
PI No.3010 Yusupujiang Aimaiti	
Monitoring land cover changes using high resolution polarimetric interforemetric SAP images	00
PI No.3011 Feng Xu	0
Using the PALSAR and PALSAR-2 data to study the movement of the active faults in China	19
Application of ALOS-2 InSAR to volcano deformation processes)0
PI No.3024 Paul Lundgren	
Application of InSAR and GPS time series to S. California earthquake cycle deformation transients)5
PI No.3025 Paul Lundgren	
InSAR-based early detection and monitoring on progressive regional landslides)9
PI No.3031 Guijie Wang	
Attribute Data Classification and Change Detection for Urban Data Revision and Sabo Facility Management using Temporal	
ALOS-2 and 3D Spatial Data	21
PI No.3035 Masafumi Nakagawa	
	5
Advancing PoiSAR methods for rapid mapping of floods, fandsides, voicanoes and fires using polarimetric L-Band SAR data ····· 32 PI No.3043 Sandro Martinis	25
Mapping and characterizing land deformation over the Gulf Coast using multi-temporal InSAR	27
Pi No.3046 Feifei Qu	
Present-day deformation along the northern margin of the Tibet Plateau inferred from SAR interferometry	31
PI No.3048 Caijun Xu	
Monitoring and seismic hazard assessing: Constraints from ALOS-2 Imagery	41
PI No.3051 Jingfa Zhang	

Earthquake and Volcanic Deformation Studies Using L-Band SAR Interferometry
Aftershocks monitoring and characterization after the Wenchuan earthquake in the Longmen Shan fault zone near the eastern margin
of Tibetan Plateau with ALOS-2/PALSAR-2 Interferometry
PI No.3058 Qiang Chen
Monitoring and modeling magma movements at Changbaishan volcano, China
Elucidating complex crustal deformation at the divergent plate boundary observed by satellite SAR
Compressive sensing of seismic slip model using space geodesy
Volcano deformation in the northern Cascade Arc, USA
Magma supply, storage, and eruption at Hawaiian volcanoes
Estimating three-dimensional postseismic deformations and crustal strain tensors with ALOS-2 InSAR measurements
Relationship analysis between beach erosion and ground deformation in Japan
Ground deformation monitoring and modeling of South-American volcanoes using satellite and ground based geodetic surveys … 406 PI No.3101 Dominique Remy
Study on fault motion of seismic gap after Wenchuan and Lushan earthquakes by PS-InSAR technique
Monitoring the landslides in the Western USA (Washington, northern California) with time-series InSAR analysis
Sinkhole collapse in southern USA captured by time-series ALOS-2 PALSAR-2 InSAR processing
Locking Differences between Different Sections along Xiaojiang Fault Zone Revealed by InSAR Time series Analysis
Development of landslide detection algorithm by using L-band SAR
East China Land Subsidence Monitoring Using PALSAR-2 ScanSAR images
Interferometric analysis of JERS-1, ALOS and ALOS-2 SAR data over active volcanoes in the Guatemalan part of the Central
America Volcanic Arc CAVA, for constraining dynamic models of magmatic processes
Processing and modeling of ALOS-2 InSAR and GPS to derive source models to monitor volcanic hazards over the Aleutian arc… 445 PI No.3147 Zhong Lu
Land Deformation Monitoring using Persistent Scatterers Interferometric Synthetic Aperture Radar (PS-InSAR)

COASTAL DEFORMATION MONITORING WITH INSAR TIME SERIES ANALYSIS
PI No.3174 Peng Li
Rock Slope Failure in Bhutan
PI No.3184 Kerry Leith
Monitoring Ground Surface Displacements at Piton de la Fournaise with PALSAR-2
PI No.3187 Jean-Luc FROGER
Mapping active deformation of the Sumatran Fault
PI No.3205 Lujia FENG
Towards a better understanding of active volcanoes in Southeast Asia from PALSAR-2 and in-situ observations
PI No.3206 Benoit Taisne
Earth Surface Deformation Monitoring Using L-band Interferometric SAR data
PI No.3210 Saygin Abdikan
InSAR Analysis of Surface Deformation over Permafrost to Estimate Active Layer Thickness (ALT) based on Heat Transfer Model
and Layered Subsidence Model of Soils
PI No.3214 Zhiwei Li
InSAR Monitoring of French Overseas Volcanoes (Lesser Antilles, Mayotte)
PI No.3225 Raphael GRANDIN
Mapping tectonic deformation in Myanmar: deciphering the Burma sliver
PI No.3240 Eric O. Lindsey
Extraction of ground movements based on InSAR analysis of PALSAR-2 data
PI No.3243 Wen LIU
Improving monitoring of New Hebrides volcanoes with high resolution interferometry using ALOS-2 data
PI No.3245 Virginie Pinel
Determination of 3D displacement and groundwater storage change in the Yangtze Delta by integrating ALOS-2 PALSAR and GPS
data
PI No.3246 CHEN Yanling
Characterization of Landslide movements by exploiting both amplitude and phase information of PALSAR-1/2 datasets
PI No.3248 Mingsheng Liao
Extraction of Crustal deformation by using DInSAR of PALSAR-2 ScanSAR images at the eastern margin of Tibet Plateau 533
PI No.3259 Jicang Wu
Mapping crustal deformation and earthquake hazard in the central San Andreas Fault system, California using L-band ALOS data · 538
Mapping crustal deformation and earthquake hazard in the central San Andreas Fault system, California using L-band ALOS data · 538 PI No.3273 ZHEN LIU
Mapping crustal deformation and earthquake hazard in the central San Andreas Fault system, California using L-band ALOS data · 538 PI No.3273 ZHEN LIU Environmental controls on landslide motion revealed by InSAR with ALOS-2 data
Mapping crustal deformation and earthquake hazard in the central San Andreas Fault system, California using L-band ALOS data · 538 PI No.3273 ZHEN LIU Environmental controls on landslide motion revealed by InSAR with ALOS-2 data ·
Mapping crustal deformation and earthquake hazard in the central San Andreas Fault system, California using L-band ALOS data · 538 PI No.3273 ZHEN LIU Environmental controls on landslide motion revealed by InSAR with ALOS-2 data ·
Mapping crustal deformation and earthquake hazard in the central San Andreas Fault system, California using L-band ALOS data · 538 PI No.3273 ZHEN LIU Environmental controls on landslide motion revealed by InSAR with ALOS-2 data · 540 PI No.3277 Eric J. Fielding Ground fissure disaster monitoring with ALOS-2/PALSAR images over Hebei, China · 540 PI No.3280 Yang Chengsheng
Mapping crustal deformation and earthquake hazard in the central San Andreas Fault system, California using L-band ALOS data - 538 PI No.3273 ZHEN LIU Environmental controls on landslide motion revealed by InSAR with ALOS-2 data

Research on volcano deformation monitoring using PALSAR-2 and ground-based radar interferometer	58
Studying the impact of ground deformation on civil infrastructures	63
PI No.3308 Salvatore Stramondo	
ALOS-2 InSAR Imaging of Natural Hazards in Northern California5	69
PI No.3311 Roland Bürgmann	
Methods of seismic building collapse extraction with multi-mode and multi- polarization ALOS SAR data	74
ALOS-2/SENTINEL-1 InSAR analysis to study earthquake cycle in the Mexican and the Indonesian subduction zone5 PI No.3328 Pathier Erwan	83
Large coverage landslide detecting and monitoring with ALOS-2/PALSAR images over Chongqing, China	90
PI No.3361 Zhang Qin	
Retrieval of interseismic displacement in coastal zones from multi-temporal PALSAR measurements	95
PI NO.5581 Lei Zhang	
Monitoring land surface movement over rugged mountain area utilize time series SAR interferometry	99
6 Land-use and land-cover research	06
Land Cover Change Trajectory of Forest Fringes Based on ScanSAR and High Resolution Data	07
Pi No.5040 Dyan K. Panuju	
Combination of optical and L-band SAR images for the land-use classification and change detection around refugee camps	12
Detection of small-scaled variations and changes	16
PI No.3175 Hiroshi Kimura	
Mapping bush encroachment and woodland on a rainfall gradient in southern Africa	20
COMBINATION OF PALSA-2 AND MULTISPECTRAL IMAGES FOR LAND COVER CLASSIFICATION	21
PI No.3398 Hasi Bagan	
7 Vegetation, forestry and wetland	522
Multi-frequency SAR time series analysis for tropical forest inventory	23
PI No.3003 Hannes Raggam	
Monitoring Tropical Plantation and Forest Rehabilitation Using L-band SAR ······ PI No.3004 Bambang H. Trisasongko	28
Vegetation scattering characterization and forest above-ground biomass retrieval over Forest-PLUS sites in India using L-band SAR data	32
PI No.3017 Anup Kumar Das	
	. 10

Combining L-band SAR and optical remote sensing time series with community-based activity data for tropical forest monitoring · 642 PI No.3036 Johannes Reiche

Identification, classification and mapping of mangrove species by using remote sensing data PI No.3080 Lim Hwee San
Polarization signature development of radar backscattering variations for azimuthal anisotropy estimation of forest by PALSAR-1 and
PALSAR-2 data
PI No.3092 Aleksey Dmitriev
Assessing forest aboveground biomass retrievals by synergy of spaceborne SAR and GNSS-R signals
PI No.3100 Maurizio Santoro
Characterizing wetland hydrology of Great Dismal Swamp using ALOS-2 SAR/InSAR technology
PI No.3115 Jin Woo Kim
Monitoring wetlands with multi-season PALSAR-2 Imagery680
PI No.3120 Laura Bourgeau-Chavez
Improving aboveground forest carbon stocks estimation method using ALOS 2/PALSAR-2 data
PI No.3148 Rajesh Bahadur Thapa
Quantification of Western Himalayan Foothills Forest Biomass Spatial Variability and Disturbance using Pol-INSAR
PI NO.5181 milenura Padana
Combining multi-frequency radar data to assess tropical forest degradation 707
PI No.3192 Joao Carreiras
Analysis of polarimetric SAR data for forest biomass estimation and biodiversity evaluation in fast-growing tree plantation
Polarimetric SAR data contribution to mapping and monitoring Parana floodplain wetlands
PI No.3219 Natalia Soledad Morandeira
Evaluating potential applications of polarimetric L-band SAR data over European temperate forests
PI No.3258 Andreas Schmitt
ALOS-2 PALSAR estimation of tropical forest structures with high-resolution validation from handheld laser-scanning ground
surveys
Space-based monitoring of wetlands and flooded areas with ALOS-2 observations
Polarimetric and Interferometric study of annual changes in temperate and boreal forests
GlobBiomass Regional Mapping
Estimation of formatic hour around biomagnetic Daland
PI No.3317 Agata Hoscilo
Development of Monitoring Technique for Forest Disaster
PI No.3330 Akira Kato
3D Mapping and Monitoring of Canopy Structure in Changing Ecosystems
PI No.3362 Marc Simard
Tibetan Plateau Cryospheric-hydrologic Processes on Downstream Bangladesh Delta Coastal Vulnerability
PI No.3368 C.K. Shum

8 Agriculture	
Soil moisture retrieval and mapping irrigated areas over agricultural areas using ALOS-2/PALSAR	
FINO	.5025 Micolas Baglidadi
Determination of crop phenological stages and crop type using L-band polarimetric SAR data	
P	'I No.3045 Rahul Nigam
Investigation of possibility for utilization of ALOS PALSAR-2 data to precision agriculture	
PI No.3054	YONEZAWA Chinatsu
Development of an adaptive algorithm for crop parameters retrieval by utilizing polarimetric data for regi	onal conservation purposes
PI No.:	3093 Dharmendra Singh
Surface and Biophysical Parameter Retrieval over Agricultural Fields Using Fully Polarimetric L-band A	LOS-2 Data
	PI No.3141 Jinfei Wang
Entropting against the information from SAD data	912
	PI No.3288 Hiroshi Tani
Assessment of SAR polarimetry for crop monitoring in the Argentinean Pampas Plain	
	NO.3323 Wallas Daiber
Development of Soil Moisture Monitoring System for Agriculture Land Situated in Indo-Gangetic Plain ·· P	
Advance SAR Technologies Observation on Rice Growth Monitoring and Yield Estimation in Kuala Sela PI No.3397 Abdul Rash	ngor, Malaysia833 iid bin Mohamed Shariff
9 Geography	
Using SAR to Identify and Map Subsurface Archaeological Features in Arid Environments	
F	I No.3090 Frances Wiig
Generation of high quality digital elevation models through matching of PALSAR-2 images and comopar	ison with digital elevation
models from optical images (Phase II)	
F	PI No.3138 Taejung Kim
InSAR measurements of magmatic and tectonic deformation in the Afar rift (Fast Africa)	
PIN	Io.3353 Samson Tesfaye
10 Geology	
Calibration and validation of BIOMASS orbital P-band SAR over arid regions	
PIN	lo.3013 Philippe Paillou
ALOS-2 data integration for monitoring of landscape degradation processes at catchment scale	
PI	No.3026 Alberto Refice

Satellite-based monitoring of Earth surface deformation caused by groundwater abstraction and subsurface coal fires in India PI No.3034 Tajdarul Hassan Syed	· 876
Detection of the Intermittent Flow Barriers in Petroleum Fields by Using ALOS-2 DInSAR data	. 885
PI No.3216 Alexander Zakharov	005
Monitoring the Large Deformation of the Mining Subsidence by ALOS-2	· 889
PI No.3217 Hongdong Fan	
11 Hydrology	· 900
Using PALSAR-2 InSAR for the study of groundwater hydrology in California Colorado	· 901
PI No.3038 Howard Zebker	
Quantifying Terrestrial Water Dynamics in the Congo Basin using PALSAR/PALSAR-2 SAR and InSAR	· 905
PI No.3069 Hyongki Lee	
ALOS-2 Applications for Water Resources Development in Arid Lands and Water-Related Geohazards in Coastal Tropical Lands- PI No.3131 Magaly Koch	· 910
Monitoring of small scale soil moisture dynamics using very high-resolution ALOS-2 PolSAR data	· 912
PI No.3193 Masanobu Shimada	
Groundwater monitoring with L-band ALOS interferometric data	· 917
PI No.3221 ZHEN LIU	
Satellite estimation of flooded area and river water level dynamics: development of multisensor strategies.	· 922
PI No.3343 Mercedes Salvia	
ALIS: ALOS-2 based monitoring of soil moisture in agricultural areas of Argentina, Italy and Japan	· 933
PI No.3373 Claudia Notarnicola	
2 Snow and ice.	. 935
Le surface displacement of glaciers and ice cans from AI OS-2/PAI SAR-2	. 936
PI No.3016 Tazio Strozzi	750
D-InSAR technology for seasonal and interannual changes analysis of permafrost zone in longitudinal gradients of North Eurasia	
Arctic	· 941
PTINO.5018 Viadimir Elsakov	
Spatial and temporal variations of surge-type glaciers in Alaska/Yukon	· 949
PI No.3021 Masato Furuya	
FINAL REPORT OF ALOS-2 RA-6 PROJECT ISIPELS	· 953
PI No.3029 Juha Karvonen	
Temporal evolution of flow velocities and structures of Patagonian Icefield revealed by SAR	· 954
PI No.3050 Masato Furuya	
Investigating Thermokarst Dynamics on the Qinghai-Tibet Plateau Using PALSAR-1 and PALSAR-2 Data	· 958
PI No.3077 Lin Liu	
Derive the precise 3D motion field of mountain glaciers and build the functional model between motion changes and mass balance PI No 3224 LI Jia	e 960

Х

RADAR Backscattering Measurements for Snow Mapping and Monitoring	
13 Polar research	
Study on ice mass balance estimation along the East Antarctic coast	
	PI No.3049 Kazuki Nakamura
Ice Velocity Mapping in the Antarctic Peninsula	
	PI No.3143 Bernd Scheuchl
Investigating the correlation between subglacial melt water flow and glacier migration by t	he SAR image interpretations and the
numerical simulations	
	PI No.3238 Jung-Rack Kim
Evaluation and validation of permafrost degradation obtained by L-band SAR data	
	PI No.3274 Go Iwahana
High accuracy measurement of the ice flow velocity on the coastal East Antarctic	
	PI No.3298 Koichiro Doi
Mapping topography and ice-flow velocity in Antarctica	
	PI No.3332 ZHOU Chunxia
Arctic sea ice type discrimination during summer melting conditions	
	PI No.3348 Randy Scharien
PALSAR-2 imaging for sub- and mesoscale dynamics in the Arctic Ocean	
	PI No.3395 Igor Kozlov
14 Oceanography and coastal zone	ng nearshore dynamics and coastal
subsidence	
	PI No.3047 Ratheesh Ramakrishnan
SAR polarimetry for ocean and coastal zones monitoring	
	PI No.3064 Maurizio Migliaccio
Oceanic dynamic phenomena and sea ice study in the Northwest Pacific Ocean and in the l	Eastern Arctic using L-band and C-band
SAR and ancillary data	
	PI No.3072 Leonid M. Mitnik
Monitoring ecosystems and aquacultures along the coast from Japan to Southeast Asia with	n use of PALSAR-2····· 1042
	PI No.3130 Teruhisa KOMATSU
Indonesian Seas Oil Pollution Seen by Spaceborne SAR (IndoSOPS3)	
	PI No.3199 Martin Gade
Using PALSAR-2 and other SAR for Classification and Intertidal Flat Monitoring (UPSCI	M) · · · · · · 1061
	PI No.3200 Martin Gade
Application of ALOS-2 for estimating coastal wave in Vietnam	
	PI No.3239 Ho Dinh Duan

Development of sea surface wind detection technique and oil spill classification
Neural Network architectures for the development of automatic processing procedures in the field of maritime applications using
ALOS-2 data
15 Resources related research
PI No.3244 Vinay Kumar
16 Polarimetry and interferometry 1089
Study of complex decorrelation phenomena in L-band and development of adequate processing methodologies in view of future
PI No.3009 Francesco De Zan
Production of urban density change and land subsidence maps using PALSAR/PALSAR-2 ······ PI No.3014 Junichi Susaki PI No.3014 Junichi Susaki
Study on estimation accuracy improvement of Scattering Component Decomposition of POLSAR data by using ALOS2 repeat-pass observation dataset
PI No.3022 Hiroyoshi Yamada
Properties and optimization of Persistent Scatterer InSAR for Long Wavelength Radar Systems
Enhancement of the Accurate Topography and Deformation Detection For PALSAR-2 SAR Interferometry by Use of Disturbance
PI No.3044 Ryo Natsuaki
Detection of slow movements of ground around active faults with InSAR time series analysis
Study on Spatio-Diversity of Snowpack Characteristics in Himalayan Climates using Full-PolSAR and PolInSAR Techniques 1116 PI No.3056 Gulab Singh
Web archive of ALOS-2 PALSAR polarimetric data for utilization and monitoring the earth surface
Monitoring of mining induced land subsidence -Differential SAR Interferomety and Persistent Scatterer Interferometry- in Russia's Perm Region (Berezniki and Solikamsk) using PALSAR-2 data
PI No.3086 Nazemeh Ashrafianfar
Temporal analysis of ALOS and ALOS-2 data for monitoring the urban enviroment
Topography removal and phase unwrapping in building dense area based on DSM······ PI No.3164 Peng Liu PI No.3164 Peng Liu
Deformation Study on Altyn Tagh Fault Based on a Modified InSAR Time Series Analysis Method

Interpretation of Polarimetric Synthetic Aperture Radar data: high-efficient alrgorithm for information extraction and intelligence
algorithm for target analysis ······ 115 PI No.3327 Fang SHANG
Investigation of Polarimetric-interferometric ALOS2 for peatland and permafrost monitoring PI No.3349 Ridha Touzi PI No.3349 Ridha Touzi
17 Ionosphere research
Ionospheric Effects in Interferometric Synthetic Aperture Radar (InSAR) in Low-latitude Area 117 PI No.3304 Bo Hu
Monitoring of Regional Scale Ionospheric Structures and Dynamics Using SAR 118 PI No.3323 Jun Su Kim
Measurement and correction of ionospheric artifacts in L-band SAR interferometry for environment and disaster monitoring 118 PI No.3380 Zhang Bochen
18 Education
The development of teaching materials in disaster preventive education and disaster mitigative education that utilize remote sensing.
PI No.3377 Hiroshi KOIZUMI
