

# Final Report on the 2nd Research Announcement on the Earth Observations

December 2023

Japan Aerospace Exploration Agency (JAXA)  
Earth Observation Research Center (EORC)

# Table of Contents

<b>1 ALOS-3 .....</b>	1
ALOS-3 観測データの農林水産業への利用可能性の評価 .....	2
PI No.: ER2A3N001 Chinatsu Yonezawa	
ALOS-3 を防災・災害対策に活用するための、位置決定精度の評価とパンシャープン手法の開発 .....	9
PI No.: ER2A3N002 Masayuki Matsuoka	
Calibration and validation of ALOS-3 imagery over Bergama and Ankara testfields, Turkey .....	13
PI No.: ER2A3N003 Sultan Kocaman	
Development of an algorithm for generation of DSM and detection of its change by using ALOS-3 data .....	15
PI No.: ER2A3N201 Junichi Susaki	
<b>2 ALOS-4 .....</b>	23
ALOS-4 ionospheric correction and cross-sensor interferometry .....	24
PI No.: ER2A4N001 Urs Wegmuller	
PALSAR-2/3 InSAR による電離層シグナルの研究 .....	29
PI No.: ER2A4N002 Masato Furuya	
PALSAR-3 の校正検証 .....	33
PI No.: ER2A4N003 Masanobu Shimada	
Evaluation of accuracy of displacement measurements of ALOS-4 in active tectonic areas .....	35
PI No.: ER2A4N004 Manabu Hashimoto	
Maximizing potential of ALOS-4 for disaster response in South and Southeast Asia .....	39
PI No.: ER2A4N005 Chin Shi Tong	
PALSAR-3 を用いた SAR 干渉法の地表変化検出性能に関する検証 .....	44
PI No.: ER2A4N006 Taku Ozawa	
PALSAR-3 干渉解析および PALSAR-2 との相互解析の検証 .....	49
PI No.: ER2A4N007 Ryo Natsuaki	

Fundamental study on ALOS-4/PALSAR-3 data calibration and validation using model-based scattering power decomposition .....	54
	PI No.: ER2A4N008 Hiroyoshi Yamada
Crops classification and soil moisture estimation over cropland in Argentina using cross calibration with SAOCOM ..	60
	PI No.: ER2A4N009 Marc Thibeault
ALOS-4/PALSAR-3 external calibration and cross-validation with SAOCOM-1 A/B .....	66
	PI No.: ER2A4N010 Angel Matias Palomeque
MIMP-SAR アプローチによる陸域／海域利用に向けた ALOS-4 標準プロダクトの校正検証 .....	70
	PI No.: ER2A4N011 Motofumi Arii
Validation of the algorithm with L-band SAR data for detecting deformed sea ice area in the Arctic Ocean .....	71
	PI No.: ER2A4N012 Takenobu Toyota
Calibration of propagation effects for SAR interferometry: ionosphere and soil moisture .....	78
	PI No.: ER2A4N013 Giorgio Gomba
Phase calibration and validation of ALOS-4 data products for InSAR applications .....	79
	PI No.: ER2A4N014 Howard Zebker
ALOS-4 PALSAR-3 validation for ice sheet science .....	88
	PI No.: ER2A4N016 Bernd Scheuchl
Framework construction and practical applications of coregistration and filtering schemes based on phasor quaternion neural networks in high-resolution Pol-InSAR .....	96
	PI No.: ER2A4N017 Akira Hirose
PALSAR-3 radiometric calibration with natural distributed targets .....	97
	PI No.: ER2A4N019 Alexander Zakharov
ALOS-4 PALSAR-3 calibration and validation activities in Sweden .....	105
	PI No.: ER2A4N020 Lars Ulander
Calibration and validation of polarimetric ALOS4-PALSAR3 .....	106
	PI No.: ER2A4N022 Ridha Touzi

<b>3 ALOS-2.....</b>	<b>108</b>
<b>3.1 Monitoring to predict natural disasters and to grasp its damage situations .....</b>	<b>108</b>
Strain accumulation monitoring on Sumatra and Java megathrust zone using ALOS-2 for prediction the potential earthquake and tsunami .....	109
PI No.: ER2A2N011 Pakhrur Razi	
Monitoring of Arctic coastal landscape change .....	121
PI No.: ER2A2N012 ZHAOHUA CHEN	
Estimation of flood extents in South and Southeast Asia using ALOS-2 SAR data .....	126
PI No.: ER2A2N019 Alok Bhardwaj	
Inspecting the Permian Basin in the US using ALOS-2 PALSAR-2 interferometry .....	136
PI No.: ER2A2N044 Jin Woo Kim	
Potential slope failure monitoring in heavy forest areas nearby hydropower stations along the Jinsha River .....	140
PI No.: ER2A2N110 Jianping Chen	
Evaluation of large earthquake potentials on Iran using ALOS-2 data .....	152
PI No.: ER2A2N140 Yo Fukushima	
ALOS-2 データを用いた地すべり危険箇所の検出およびモニタリング .....	157
PI No.: ER2A2N169 Atsuko Nonomura	
<b>3.2 Civil infrastructures monitoring .....</b>	<b>161</b>
Using ALOS-2 data to detect and monitor instability of bank slopes for mega hydropower projects in Southwest China .....	162
PI No.: ER2A2N008 Lu Zhang	
Time series deformation monitoring of solid waste landfills using ALOS1/2 images .....	175
PI NO.: ER2A2N018 Yanan Du	
Deformation characteristics monitoring of long-span bridges combined using ALOS-1/2 and other SAR data stacks	185
PI No.: ER2A2N020 Lu Zhang	
Soil moisture monitoring for infrastructure construction and maintenance .....	200
PI No.: ER2A2N026 Tomohiro Narumi	

<b>3.3 Disaster and earthquake .....</b>	<b>204</b>
Urban environmental monitoring using PolSAR and PSInSAR .....	205
PI No.: ER2A2N004 Josaphat Tetuko Sri Sumantyo	
Determining landslide parameters and locations with seismic network and SAR monitoring.....	210
PI No.: ER2A2N006 Yunung Nina Lin	
Estimation of 3-D displacement and its accuracy of airports and dike by using satellite SAR images and GPS data..	213
PI No.: ER2A2N009 Junichi Susaki	
Mapping subsidence and relative sea-level change for decision support and hazards planning in South and Southeast Asia.....	223
PI No.: ER2A2N010 Emma M Hill	
Simultaneous co and postseismic slip inversion using ALOS-2 and Sentinel-1 data from different orbits with applications to large magnitude thrust earthquakes.....	228
PI No.: ER2A2N016 Wenbin Xu	
Extracting three-dimensional deformations of landslides based on ALOS-2 and ground-based SAR data .....	236
PI No.: ER2A2N031 Jun Hu	
Unique application of L-band InSAR with ALOS-2 for studying high hazard and vegetated volcanoes in the southern Andes.....	247
PI No.: ER2A2N033 Matthew Pritchard	
Investigating of landslide activities by exploiting both phase and amplitude information of ALOS PALSAR datasets .....	250
PI No.: ER2A2N047 Yanan JIANG	
Combining L-band SAR data, optical data and active fire alerts for detecting and characterising fire-related tropical forest dynamics.....	254
PI No.: ER2A2N054 Johannes Reiche	
Using ALOS-2 SAR interferometry to evaluate the activity of deep-seated landslides and to help remediation planning in catastrophic landslide hazard mitigation in Taiwan.....	260
PI No.: ER2A2N056 Ching-Wee Lin	
Mapping and monitoring active deformation along the Sumatran fault system using ALOS-2 and GPS.....	265
PI No.: ER2A2N072 Lujia FENG	

Volcanic hazard assessment using multi-temporal ALOS-2 imagery.....	268
	PI No.: ER2A2N079 MinJeong Jo
Rapid-intelligent response system for disaster damage mapping using ALOS-2 data .....	272
	PI No.: ER2A2N087 Bruno ADRIANO
Towards a better understanding of active volcanoes in Southeast Asia from PALSAR-2 and in-situ observations.....	274
	PI No.: ER2A2N089 Benoit Taisne
Landslide inventory and precise monitoring with L band ALOS2 PALSAR2 images in the Three Gorges area of China .....	279
	PI No.: ER2A2N106 Xuguo Shi
Mapping and characterizing the landslides in Pacific Northwest US by InSAR, precipitation, and soil moisture datasets .....	283
	PI No.: ER2A2N109 Jin Woo Kim
Study on kinematics of the Karakoram fault and its role in the westward lateral extrusion of the Tibetan Plateau using ALOS-2 data.....	287
	PI No.: ER2A2N111 Guoyan Jiang
Using ALOS-2 SAR interferometry to monitor the land surface deformation induced by seasonal freezing and groundwater pumping in Songnen Plain, Northeastern China .....	291
	PI No.: ER2A2N114 Qing Wang
Small-scale and large area landslide detection, monitoring and early warning with ALOS/PALSAR-2 data over the Loess Plateau, China .....	303
	PI No.: ER2A2N118 Chaoying Zhao
Analysis of Forest fire using radar .....	311
	PI No.: ER2A2N126 Ling Chang
Urban form characterization and their backscattering library generation using temporal L-band SAR images for operational flood disaster response. ....	312
	PI No.: ER2A2N137 V.S.K. Vanama
Landslide recovering rate due to climate change effect after enormous disasters.....	313
	PI No.: ER2A2N142 Kuo-Lung WANG

Detection of Floods from ALOS2 Synthetic Aperture Radar Data .....	318
	PI No.: ER2A2N154 Kiran Yarrakula

Monitoring and modeling 3D time-series ground deformations caused by underground resource exploitation using ALOS-2 data.....	323
	PI No.: ER2A2N161 Xiaoge Liu

Study on activity and stress and strain of earthquake process in Qinghai-Tibet Plateau.....	332
	PI No.: ER2A2N171 Yongsheng Li

PIXEL グループによる SAR を用いた多角的な地殻・地表変動研究 .....	335
	PI No.: ER2A2N187 Youichiro Takada

ALOS-2 data mining for rapid response to natural hazards and systematic deformation monitoring related to solid earth geodynamics.....	347
	PI No.: ER2A2N189 Mahdi Motagh

<b>3.4 Land-use and land-cover research .....</b>	349
Polarimetric decomposition and classification for land cover identification and change analysis.....	350
	PI No.: ER2A2N071 LEE Ken Yoong

Using ALOS-2 PALSAR-2 to decompose land subsidence associated with multiple Land use in Taiwan.....	351
	PI No.: ER2A2N101 Kuo-Hsin Tseng

Spatio-temporal analysis of L-band SAR data for flood mapping with a special emphasis on Indian mega cities.....	355
	PI No.: ER2A2N121 Y. S. Rao

Efficient deep learning approach for development of an adaptive crop classification and soil moisture map using fully polarimetric SAR data .....	359
	PI No.: ER2A2N147 Dharmendra Singh

<b>3.5 Vegetation, forestry and wetland .....</b>	370
Estimating forest above-ground biomass change in East Africa from L-band SAR data.....	371
	PI No.: ER2A2N055 Shaun Quegan

Temporal variations in PALSAR-2 and tower radar measurements over a boreal forest.....	375
	PI No.: ER2A2N059 Lars Ulander

PALSAR-2 time series for vegetation and surface moisture analysis in different ecosystems of South Africa .....	377
	PI No.: ER2A2N064 Marcel Urban

Tropical peat watch demonstrator Indonesia .....	378
	PI No.: ER2A2N076 Dirk Hoekman
Multi-year monitoring of forest cover change in the endangered African dry tropical forest .....	386
	PI No.: ER2A2N078 Masanobu Shimada
Monitoring coastal wetlands in the Laurentian Great Lakes using PolSAR and InSAR techniques.....	388
	PI No.: ER2A2N093 Michael Battaglia
Forest structure information extraction from multi-dimension features of ALOS2 PALSAR2 data.....	394
	PI No.: ER2A2N095 Erxue Chen
Characterization of Amazon floodplain forest habitats and inundation dynamics using PALSAR-2 time series .....	403
	PI No.: ER2A2N097 Christiane Schmullius
Deforestation detection by using coherence change in Japanese forest .....	410
	PI No.: ER2A2N099 Masanobu Shimada
Decadal forest biomass change with ALOS-1 and ALOS-2 L-band SAR observations .....	414
	PI No.: ER2A2N102 Maurizio Santoro
Monitoring mangrove carbon stocks using SAR data and machine learning techniques in Vietnam and monitoring forest communities in Australia using multi temporal SAR remotely sensed data and advanced machine learning techniques .....	420
	PI No.: ER2A2N103 Tien Dat Pham
Above-ground biomass change in the woodlands and savannas of Southern Africa .....	421
	PI No.: ER2A2N104 Alexandre Bouvet
Large scale monitoring of wetland using the multi-temporal ALOS-2 data.....	424
	PI No.: ER2A2N131 Lingli Zhao
Evaluating effectiveness of community forestry program in Cambodia using geospatial data .....	426
	PI No.: ER2A2N133 Ram Avtar
Multi-sensor deforestation monitoring over dry Chaco Forest in Argentina.....	428
	PI No.: ER2A2N151 Matias Barber
Retrieval of forest biomass and biomass change using PALSAR, PALSAR-2 and PALSAR-3 data.....	433
	PI No.: ER2A2N155 Johan Fransson

Forest above-ground biomass estimation in subtropical hilly area based on ALOS PALSAR-2 data.....	435
	PI No.: ER2A2N158 Changcheng Wang
Using remote sensing to monitor ecological and social changes in tropical agroforestry landscapes.....	441
	PI No.: ER2A2N181 Casey Ryan
Mapping between semi-forest and natural forest in the Southwest Ethiopia using ALOS-2 and optical satellite sensors .....	442
	PI No.: ER2A2N183 Byongjun Hwang
Monitoring degradation of tropical natural forest using multi-sensor data from ALOS satellites.....	447
	PI No.: ER2A2N186 Nguyen Thanh Hoan
Biomass estimation for an improved understanding of the enhanced carbon emission due to forest clearing in Ukhia, Teknaf for Rohingya Settlements .....	455
	PI No.: ER2A2N188 Dewan Mohammad Enamul Haque
Estimation of forest above ground biomass by ALOS-2 data .....	468
	PI No.: ER2A2N208 Tomomichi Kato
<b>3.6 Agriculture .....</b>	469
Multi-temporal PALSAR data large-scale crop mapping based on a deep learning architecture.....	470
	PI No.: ER2A2N127 Hong Zhang
多様な生態系における ALOS2/PALSAR2 データ特性把握と利用推進.....	477
	PI No.: ER2A2N129 Genya Saito
Development of algorithm for surface soil moisture and vegetation water content retrieval in oil palm trees using PALSAR 2/3 .....	485
	PI No.: ER2A2N180 Abdul Rashid Bin Mohamed Shariff
<b>3.7 Geography .....</b>	489
Using PALSAR-2 data to support landscape archaeology in Central Asia.....	490
	PI No.: ER2A2N159 Timo Balz
<b>3.8 Geology .....</b>	495
Detection of surface deformation in the Lesser Antilles using ALOS-2 .....	496
	PI No.: ER2A2N002 Elske de Zeeuw-van Dalfsen

Monitoring of surface deformation and seismicity on eastern edge of Tibetan Plateau after three strong earthquakes using ALOS-2/PALSAR-2 imagery data.....	500
	PI No.: ER2A2N027 Qiang Chen
Deciphering aseismic fault processes using InSAR time series analysis of ALOS-2 data.....	504
	PI No.: ER2A2N028 Yo Fukushima
Deriving coseismic displacement from advanced SAR imagery Applications to large earthquakes since 2015 .....	509
	PI No.: ER2A2N050 Teng Wang
Evaluation of ALOS-2 SAR observations to explore ground subsidence using a time-series of displacement at Pusan city in Korea .....	510
	PI No.: ER2A2N057 Sang-Hoon Hong
Monitoring Aleutian Volcanoes using geodetic data assimilation based on ALOS-2.....	513
	PI No.: ER2A2N061 Zhong Lu
Assessing time-dependent surface deformation and active structure movement at the plate boundary zones in Taiwan .....	515
	PI No.: ER2A2N085 Ray Y. Chuang
Investigating current deformation of volcanic edifices in tropical environments: case studies of Ambrym and La Soufrière de Guadeloupe volcanoes .....	522
	PI No.: ER2A2N086 Hélène Le Mével
Identify and monitor growth faulting by using InSAR analysis over Greater-Houston region .....	526
	PI No.: ER2A2N123 Feifei Qu
Investigating the creeping-to-locked transition segment of the Philippine fault on Leyte Island using long-span InSAR observations.....	528
	PI No.: ER2A2N136 Yinghui Yang
Retrieval of crustal deformation in the seismic cycle using InSAR measurements .....	535
	PI No.: ER2A2N173 Cristiano Tolomei
Jakarta metro land subsidence Jakarta derived from SAR data.....	539
	PI No.: ER2A2N182 Agustan

Measurement of seaward ground deformation on coastal landfill area using ALOS2 PALSAR2 radar interferometry	543
PI No.: ER2A2N204 Hyung-Sup Jung	
<b>3.9 Snow and ice.....</b>	550
Permafrost deformation dynamics in the Northern Tibet from ALOS-2 .....	551
PI No.: ER2A2N030 Chao Wang	
Automatically delineating terminus of glaciers in Greenland using PALSAR-2 Data.....	553
PI No.: ER2A2N077 Lin Liu	
Mapping permafrost thaw subsidence using PALSAR-2 and ground measurements.....	555
PI No.: ER2A2N081 Lin Liu	
SAR データ等を用いた豪雪地域の積雪深分布プロダクトの開発.....	557
PI No.: ER2A2N135 Hiroto Nagai	
Monitoring glacier change over the Tibetan Plateau based on ALOS-2.....	563
PI No.: ER2A2N184 Changqing Ke	
Monitoring typical ice movements with ALOS-2 for glacier avalanche disaster mitigation in the Tibetan Plateau .....	564
PI No.: ER2A2N191 Jinghui Fan	
<b>3.10 Polar research .....</b>	570
Advancing information extraction on Arctic sea ice using a multi-sensor and multi-temporal integrated approach....	571
PI No.: ER2A2N013 Torbjorn Eltoft	
Assessing thermokarst and freeze/thaw damages on land use and infrastructure in arctic and alpine permafrost regions .....	576
PI No.: ER2A2N014 Go Iwahana	
Application of ALOS-2 for fire danger assessment in the North American boreal and Arctic regions.....	581
PI No.: ER2A2N037 Laura L. Bourgeau-Chavez	
Monitoring permafrost active layer dynamics with ALOS.....	588
PI No.: ER2A2N058 Sang-Eun Park	
InSAR based ice velocity and grounding line measurements in Antarctica .....	592
PI No.: ER2A2N107 Bernd Scheuchl	

Sea ice characteristics during transition periods in the marginal ice zone of the Pacific Arctic Ocean utilizing Quad-Pol SAR data .....	596
	PI No.: ER2A2N144 Hyangsun Han
Interaction of ice flow and subglacial lakes in Antarctica observed by synthetic aperture radar interferometry .....	601
	PI No.: ER2A2N164 Hoonyol Lee
Evaluation of glacier movement and crustal rebound in the Greenland with a time-series analysis using multi-temporal ALOS-2 PALSAR-2 observations.....	606
	PI No.: ER2A2N177 Sang-Hoon Hong
<b>3.11 Oceanography and coastal zone .....</b>	<b>608</b>
Subsidence of coastal reclamation land monitoring with advanced InSAR technique.....	609
	PI No.: ER2A2N082 Liu Guang
Commercial vessels detection and classification using deep learning with ALOS-2 imagery.....	618
	PI No.: ER2A2N090 Chao Wang
Characteristics of sea surface wind fields in the seas around the Korean Peninsula from PALSAR data and air-sea Interaction.....	621
	PI No.: ER2A2N124 Kyung-Ae Park
<b>3.12 Resources related research.....</b>	<b>627</b>
Investigation of natural surfaces by using different SAR missions for risk and water resources management .....	628
	PI No.: ER2A2N062 Simone Pettinato
Integration of ALOS-2 and Sentinel-1 data for monitoring of fast deformation caused underground coal exploitation in upper Silesian Coal Basins .....	635
	PI No.: ER2A2N206 Kamila Pawluszek-Filipiak
<b>3.13 Polarimetry and interferometry .....</b>	<b>638</b>
InSAR における電離層および中性大気遅延効果の補正手法高精度化に関する研究.....	639
	PI No.: ER2A2N001 Yohei Kinoshita
Moment and strain accumulation rate along the San Andreas fault system from InSAR and GPS.....	644
	PI No.: ER2A2N015 Xiaohua Xu
A fine deformation velocity across the Lijiang-Xiaojinhe fault in southwestern China inverted jointly from InSAR and GPS observation .....	648
	PI No.: ER2A2N025 Xiaogang Song

The characteristics and evolution of surface deformation induced by agricultural irrigation in the Junggar Basin from the InSAR measurement.....	653
	PI No.: ER2A2N038 Guangcai Feng
Comprehensive study and monitoring of geodynamic processes in the Kurile-Kamchatka subduction zone by joint interpretation of satellite SAR and surface data .....	659
	PI No.: ER2A2N075 Valentin Mikhailov
Landslide deformation monitoring and mechanism inversion revealed by advanced InSAR techniques.....	666
	PI No.: ER2A2N100 Yuanyuan Liu
Multi-temporal InSAR analysis of high-speed railway deformation in Beijing-Tianjin-Hebei region using PALSAR-2 .....	671
	PI No.: ER2A2N115 Qingli Luo
New applications of ALOS-2/4 L-band SAR and InSAR data over permafrost regions.....	677
	PI No.: ER2A2N128 Franz Meyer
複数衛星データの統合解析による広域環境変動と自然災害発生状況の関係分析.....	682
	PI No.: ER2A2N153 Yasunori Nakayama
Multi-temporal interferometric SAR data analysis for displacement mapping of earthquake and urban areas .....	691
	PI No.: PER2A2N190 Divya Sekhar Vaka
Observation of peatland in Indonesia using interferometry SAR.....	694
	PI No.: ER2A2N201 Yessy Arvelyna
長期に蓄積された SAR データを用いた複合的地表変動メカニズムの解明.....	698
	PI No.: ER2A2N202 Kazuya Ishitsuka
<b>3.14 Other .....</b>	<b>705</b>
Long-trem dual-frequency SAR backscatter dynamics of a salt flat in Northern Chile.....	706
	PI No.: ER2A2N178 Matias Barber
