

EarthCARE ESA Data Products

Tobias Wehr
tobias.wehr@esa.int

16/02/2022

ESA UNCLASSIFIED – For ESA Official Use Only

EarthCARE

Observations:

- Cloud profiles (ice, liquid, mixed), cloud coverage, precipitation
- Aerosol profiles
- Broad-band Solar & Thermal Radiation

Satellite and Payload

- Sun-sync. orbit at 393 km, 14:00 hours descending node
- UV Lidar with high spectral resolution receiver
- W-band Cloud Radar with Doppler (contribution JAXA)
- Imager and Broad-Band Radiometer
- Launch October 2023

CPR – Cloud Profiling Radar
W-Band with Doppler

ATLID – Atmospheric Lidar
355 nm HSRL with depol. channel

MSI – Multi-Spectral Imager
4 solar, 3 thermal channels

BBR – Broad-Band Radiometer
3 FoV (forward, nadir, backwards),
broadband solar and thermal channel

Legend

Produced externally (JAXA, ...)

reuse of calibration product(s) from previous processor runs

# X-JSG
X-MET

L0

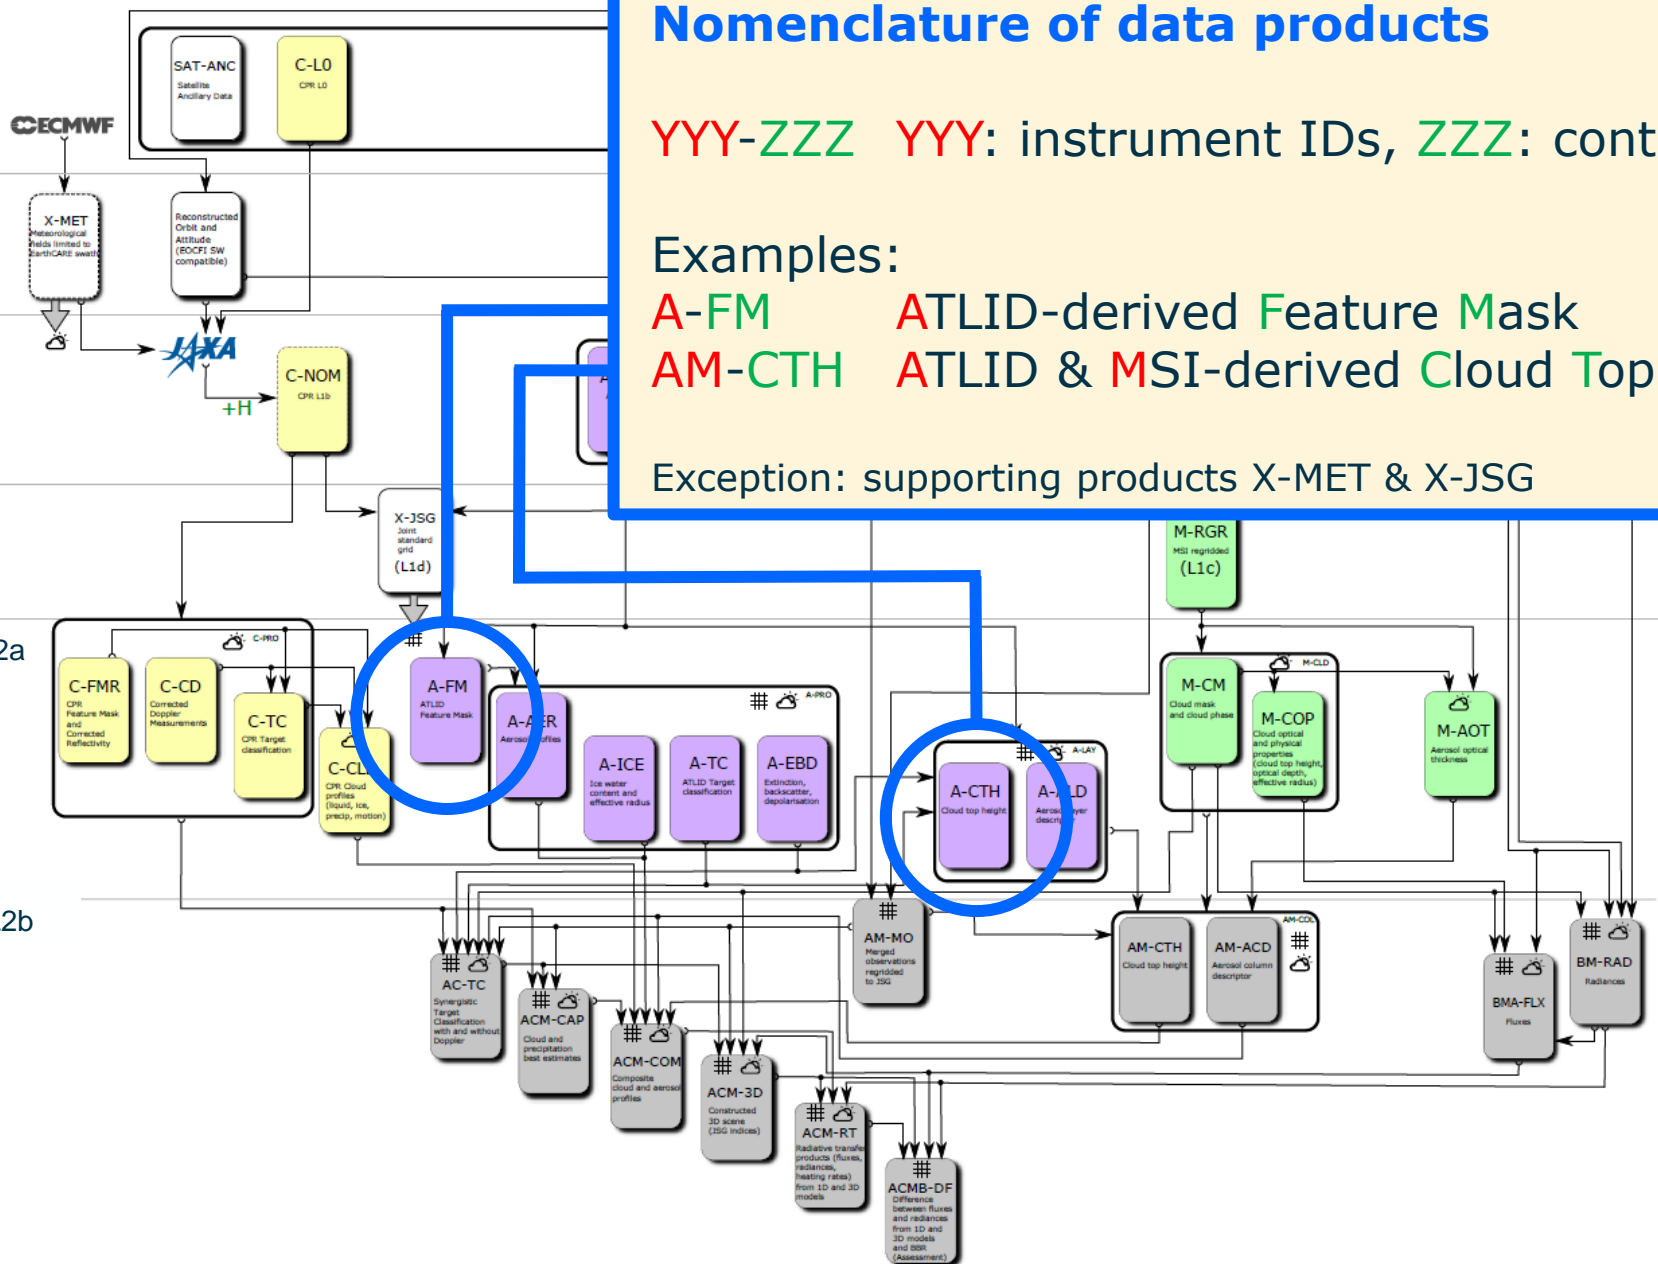

Aux

L1b

L1c/d

ESA L2a

ESA L2b

Nomenclature of data products

YYY-ZZZ YYY: instrument IDs, ZZZ: content reference

Examples:

A-FM

ATLID-derived Feature Mask

AM-CTH

ATLID & MSI-derived Cloud Top Height

Exception: supporting products X-MET & X-JSG

EarthCARE Data Product Tree

Legend

Produced externally (JAXA, ...)

reuse of calibration product(s) from previous processor runs

Products produced by single processor

Tentative inputs

Add XML header file

Products used by other processors as indicated by these symbols:

X-JSG

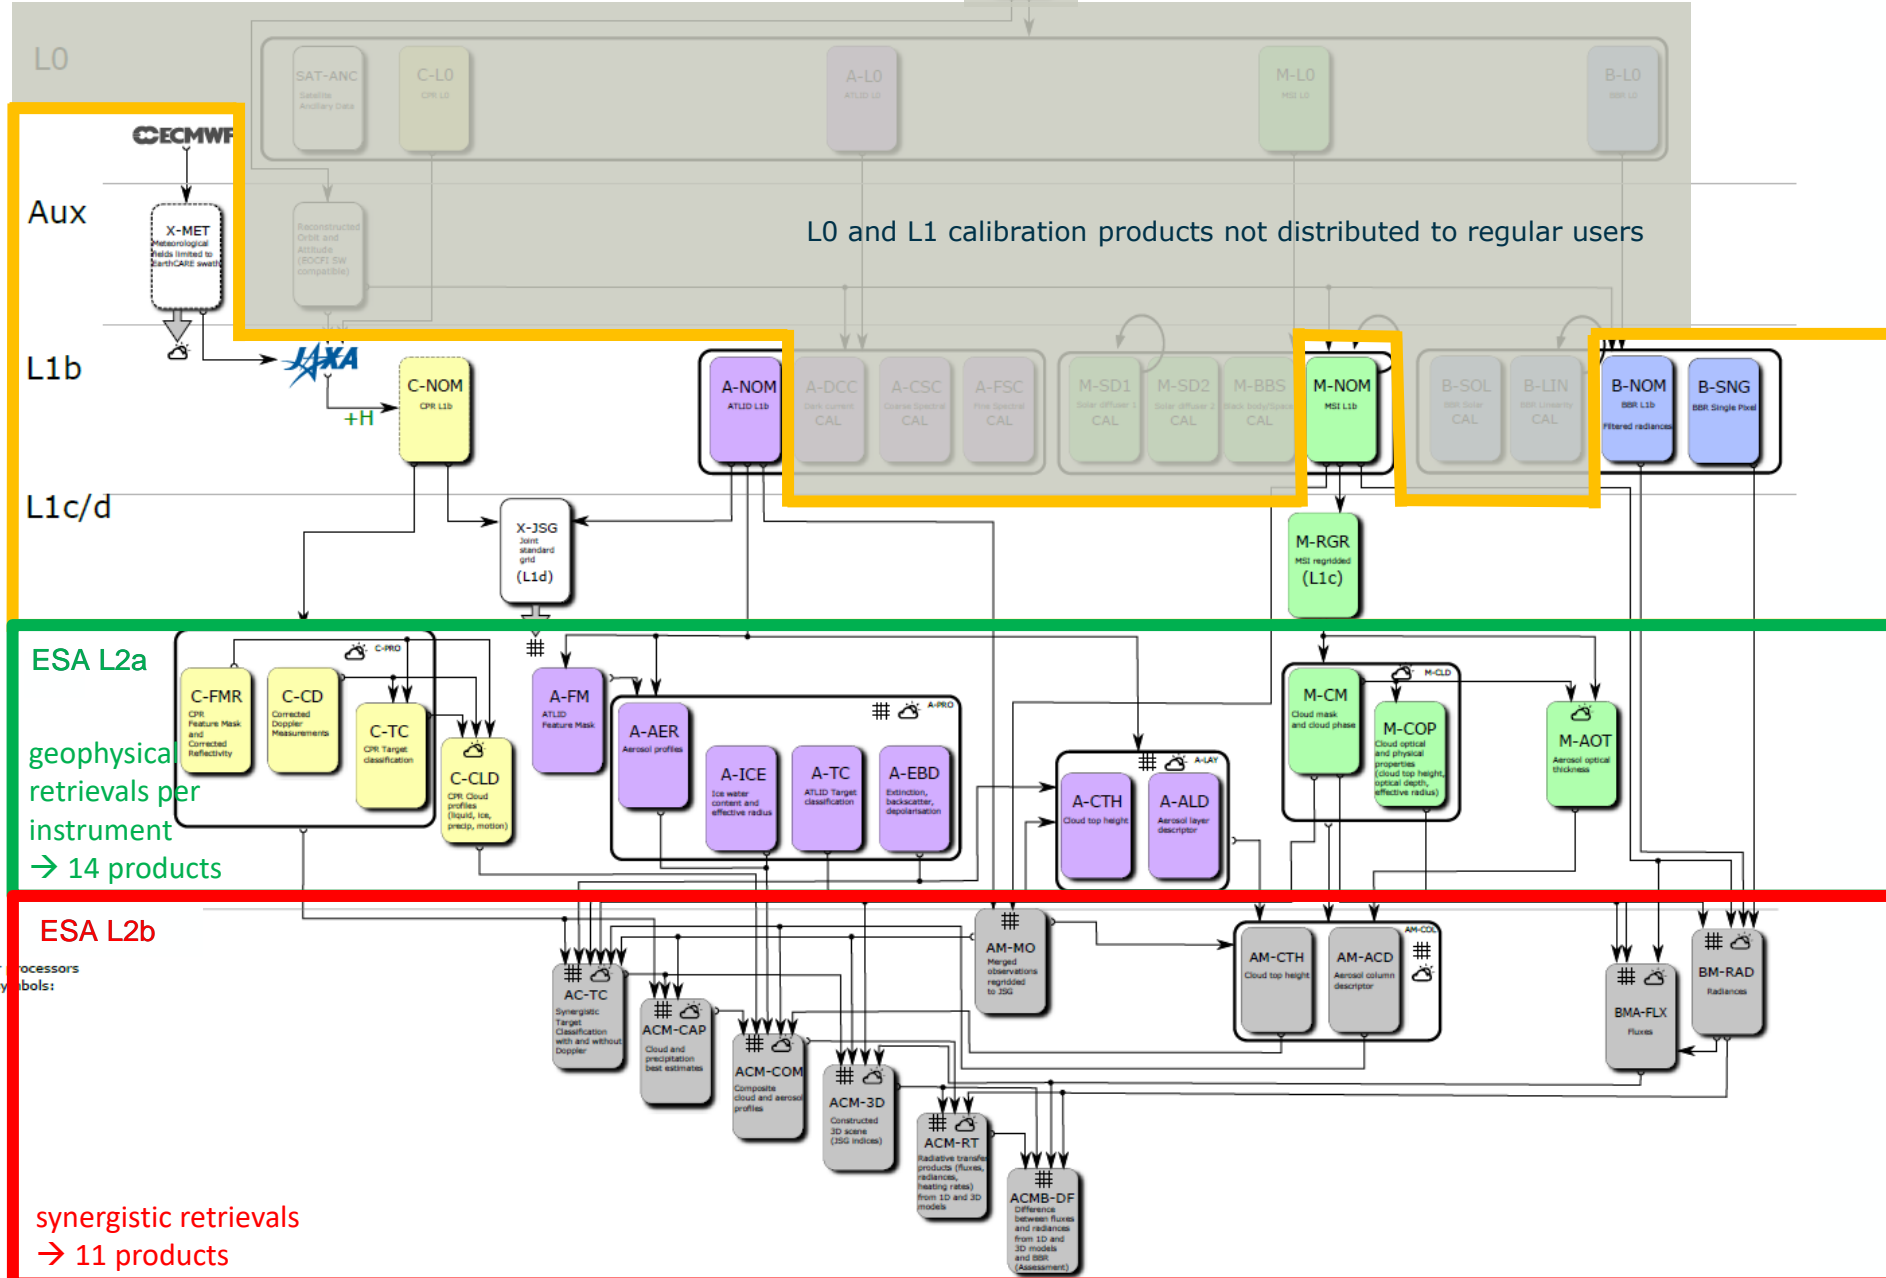

☁ X-MET

ESA data products will be produced operationally by the ESA ground segment located at ESRIN.

JAXA data products fall in two categories:
Standard Products: produced and released by JAXA Mission Operation System:

(1) CPR echo and cloud products; (2) ATLID feature & target mask, aerosol & cloud products, PBL height; (3) MSI cloud products; (4) CPR-ATLID synergistic cloud products; (5) CPR-ATLID-MSI synergistic cloud products; (6) Four-sensor synergy radiative products.

Research Products: processed by either JAXA/EORC or co-operating Japanese Laboratories, are single or multi-sensor cloud, aerosol, precipitation, snow and air motion products.

X-MET and X-JSG Products

ESA data products will be produced operationally by the ESA ground segment located at ESRIN.

JAXA data products fall in two categories:
Standard Products: produced and released by JAXA operation

cho and
ducts; (2)
ture &
mask, aerosol
products, PBL
(3) MSI cloud
(4) CPR-
nergistic
ducts; (5)

CPR-ATLID-MSI synergistic cloud products; (6) Four-sensor synergy radiative products.
Research Products: processed by either JAXA/EORC or co-operating Japanese Laboratories, are single or multi-sensor cloud, aerosol, precipitation, snow and air motion products.

Produced externally (JAXA, ...)

reuse of calibration product(s) from previous processor runs

Products produced by single processor

Products used by other processors as indicated by these symbols:

X-JSG

☁ X-MET

Level 1 Products

C-NOM:
radar reflectivity (dBZ)
Doppler velocity (m/s)

A-NOM:
attenuated backscatter in
"Mie" channel, "Rayleigh" channel,
cross-polar channel

Aux

L1b

L1c/d

ESA L2a

ESA L2b

M-NOM:
radiances in solar channels
 T_B in thermal channels

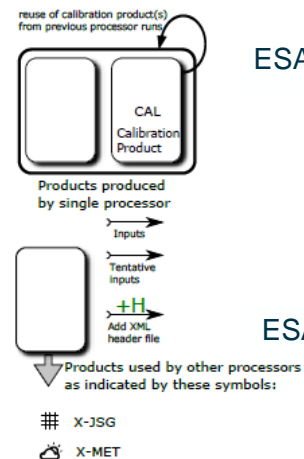

M-RGR:
radiances in solar channels, re-gridded
 T_B in thermal channels, re-gridded

Since the seven channels of MSI are not accurately aligned, this product uses one (selectable) channel as reference and spatially re-samples all other channels to the reference channels, so that all channels are fully aligned.
(Note: on the MSI own grid, not on the JSG.)

B-NOM:
Filtered SW and LW radiances
resolutions: 10km x 10km (standard)
5km x 10km (small)
17/28km x 10km (full)

B-SNG:
Filtered SW and LW radiances
high resolution corresponding to along-track
sampling and detector resolution
→ usage: customise spatial resolution

Note: These data products contain filtered radiances, which are **scientifically not directly useable**, before unfiltering has happened.
Therefore: **science users advised to use BM-RAD product!**

ESA data products
will be produced
operationally by the
ESA ground segment
located at ESRIN.

JAXA data products
fall in two categories:
Standard Products:
produced and
released by JAXA
Mission Operation
System:
(1) CPR echo and
cloud products; (2)
ATLID feature &
target mask, aerosol

CPR Level 1b (JAXA)

Radar reflectivity and Doppler velocity profiles

ATLID Level 1b (ESA)

Attenuated backscatter in

- Rayleigh channel
- Co-polar Mie channel
- Cross-polar Mie channel

MSI Level 1b/c (ESA)

TOA radiances for four solar channels, TOA brightness temperatures for three thermal channels

CPR Level 2a

Radar echo product, feature mask, cloud type, liquid and ice cloud properties, vertical motion, rain and snow estimates, ...

ATLID Level 2a

Feature mask and target classification, extinction, backscatter & depol. profiles, aerosol properties, ice cloud properties, ...

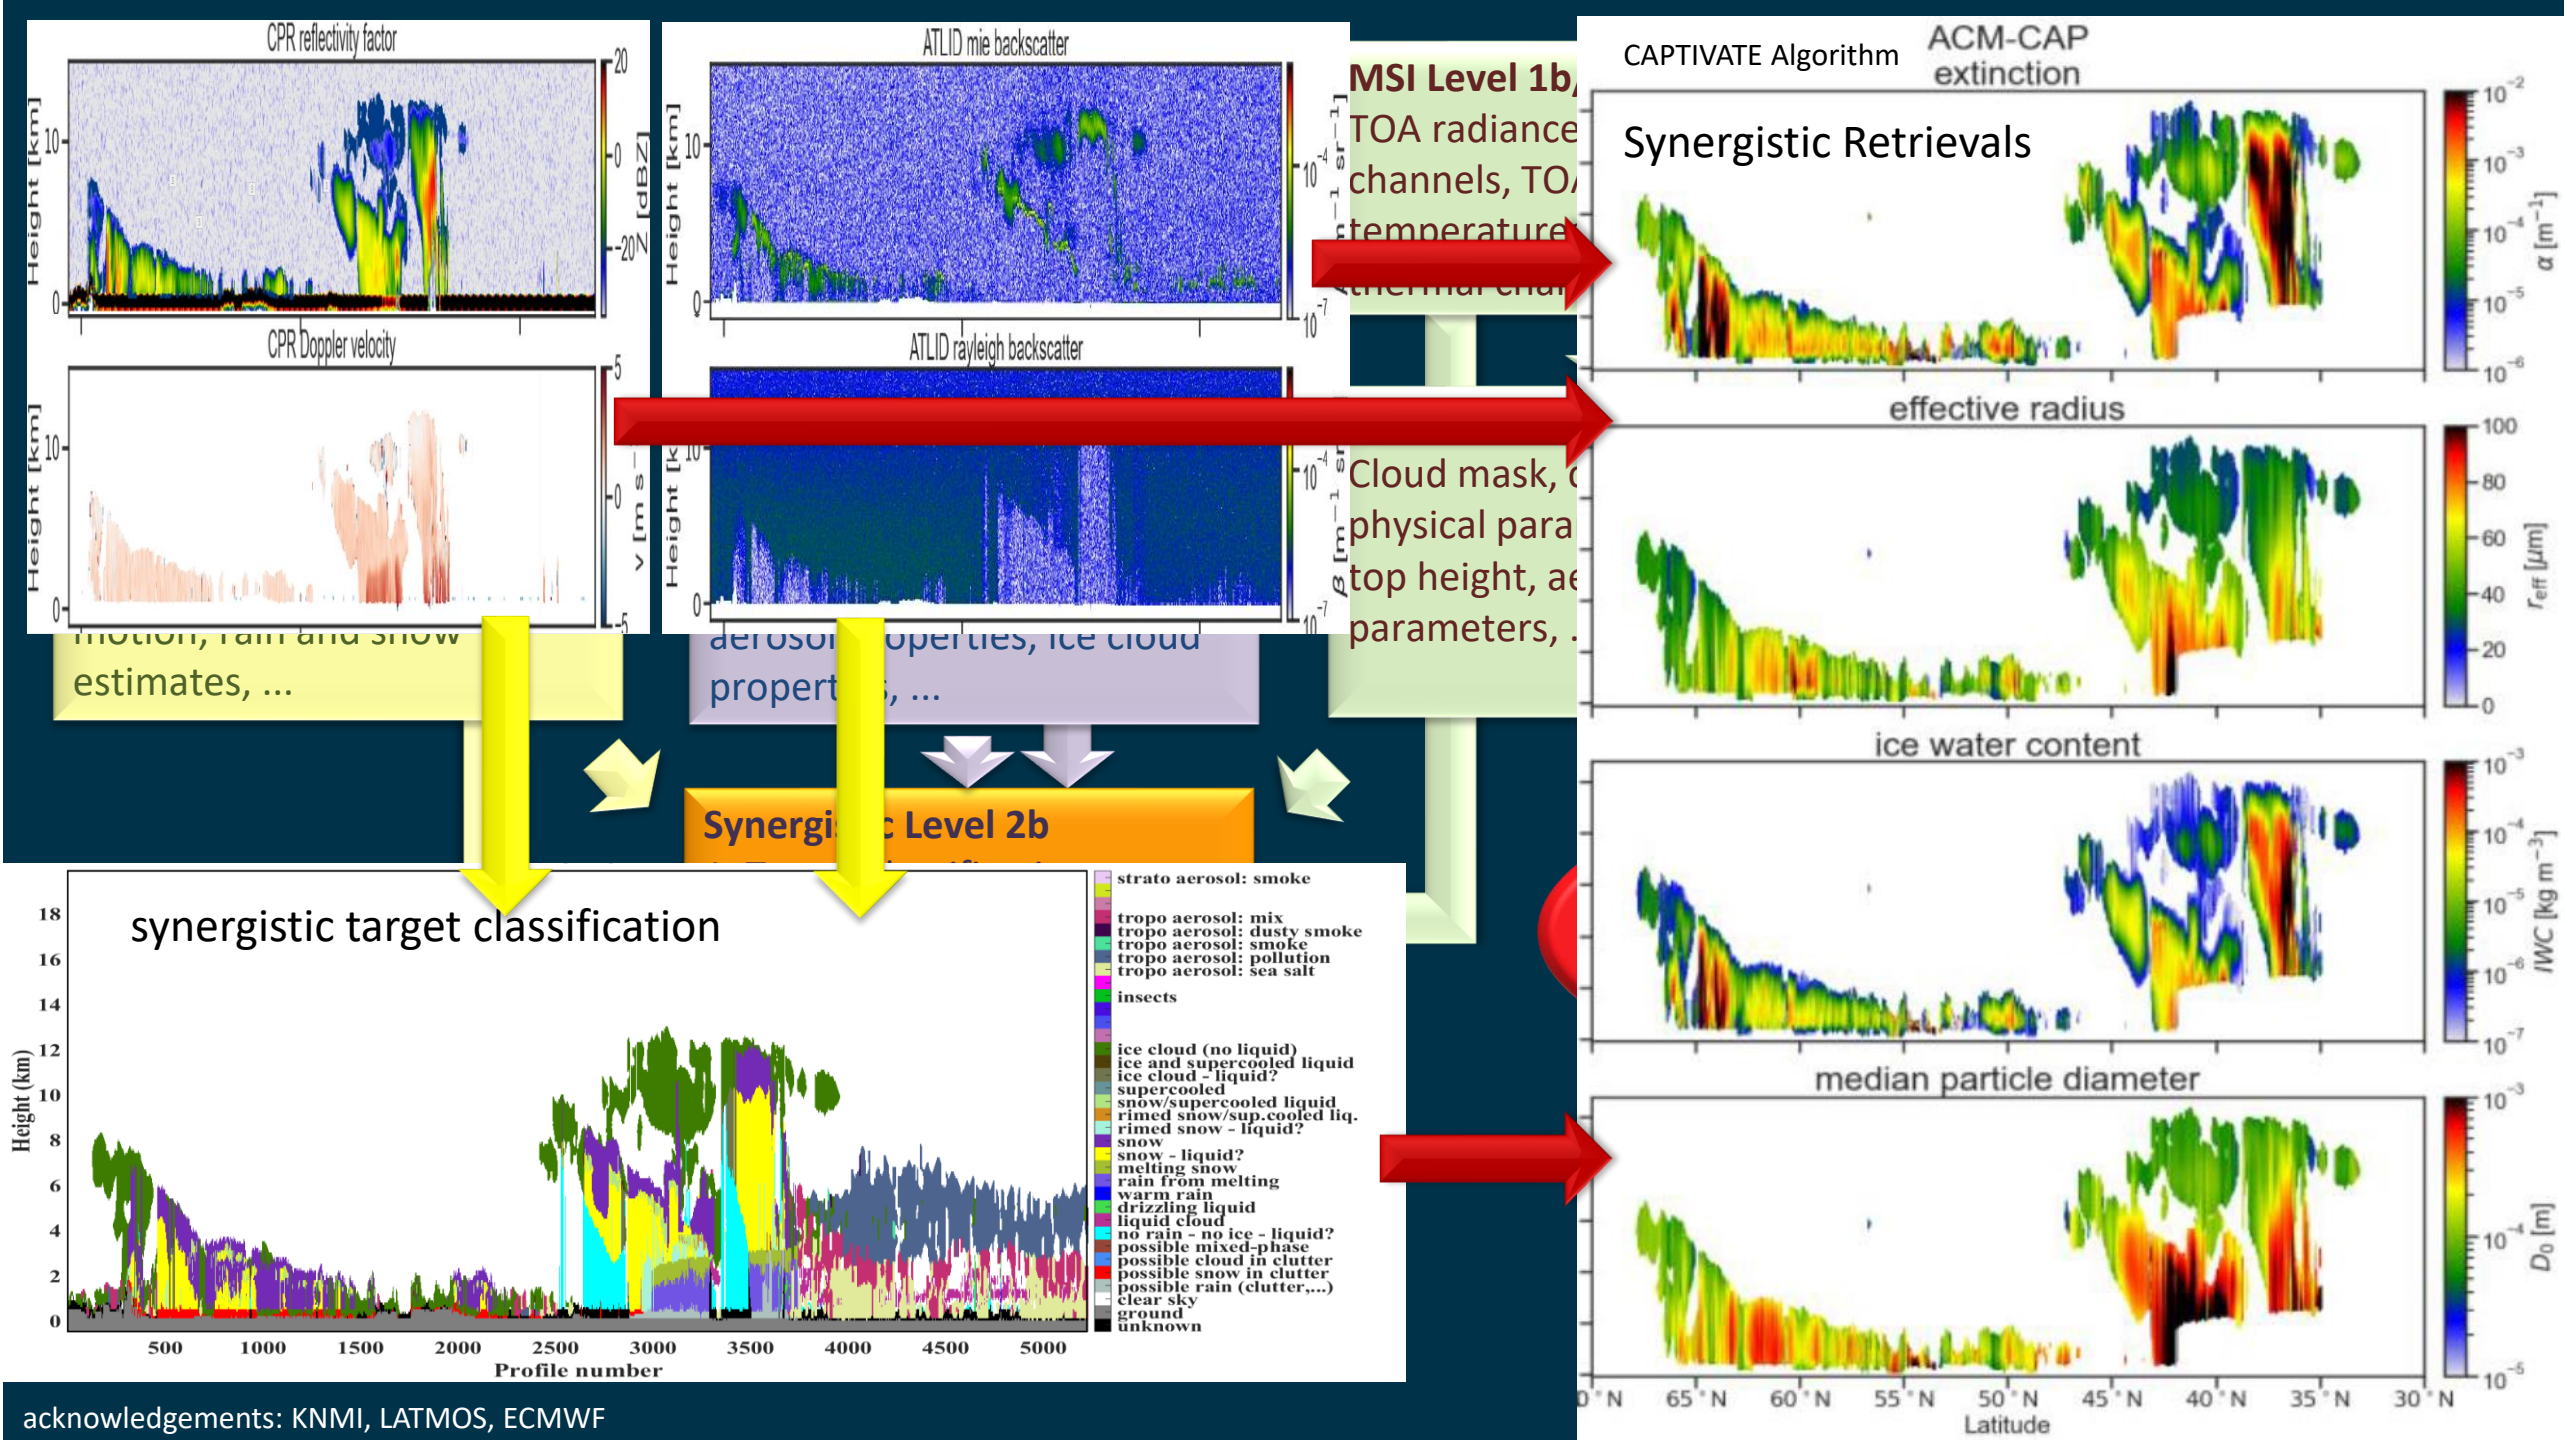

MSI Level 2a

Cloud mask, cloud micro-physical parameters, cloud top height, aerosol parameters, ...

Synergistic Level 2b

1. Target classification
2. Cloud & aer. prof. at x-sec

EarthCARE
Data Production
Model

CPR Level 1b (JAXA)

Radar reflectivity and Doppler velocity profiles

ATLID Level 1b (ESA)

Attenuated backscatter in

- Rayleigh channel
- Co-polar Mie channel
- Cross-polar Mie channel

MSI Level 1b/c (ESA)

TOA radiances for four solar channels. TOA brightness

CPR Level 2a

Radar echo product, feature mask, cloud type, liquid and ice cloud properties, vertical motion, rain and snow estimates, ...

ATLID Level 2a

Feature mask and target classification, extinction, backscatter & depol. profiles, aerosol properties, ice cloud properties, ...

Synergistic Level 2b

1. Target classification
2. Cloud & aer. prof. at x-sec

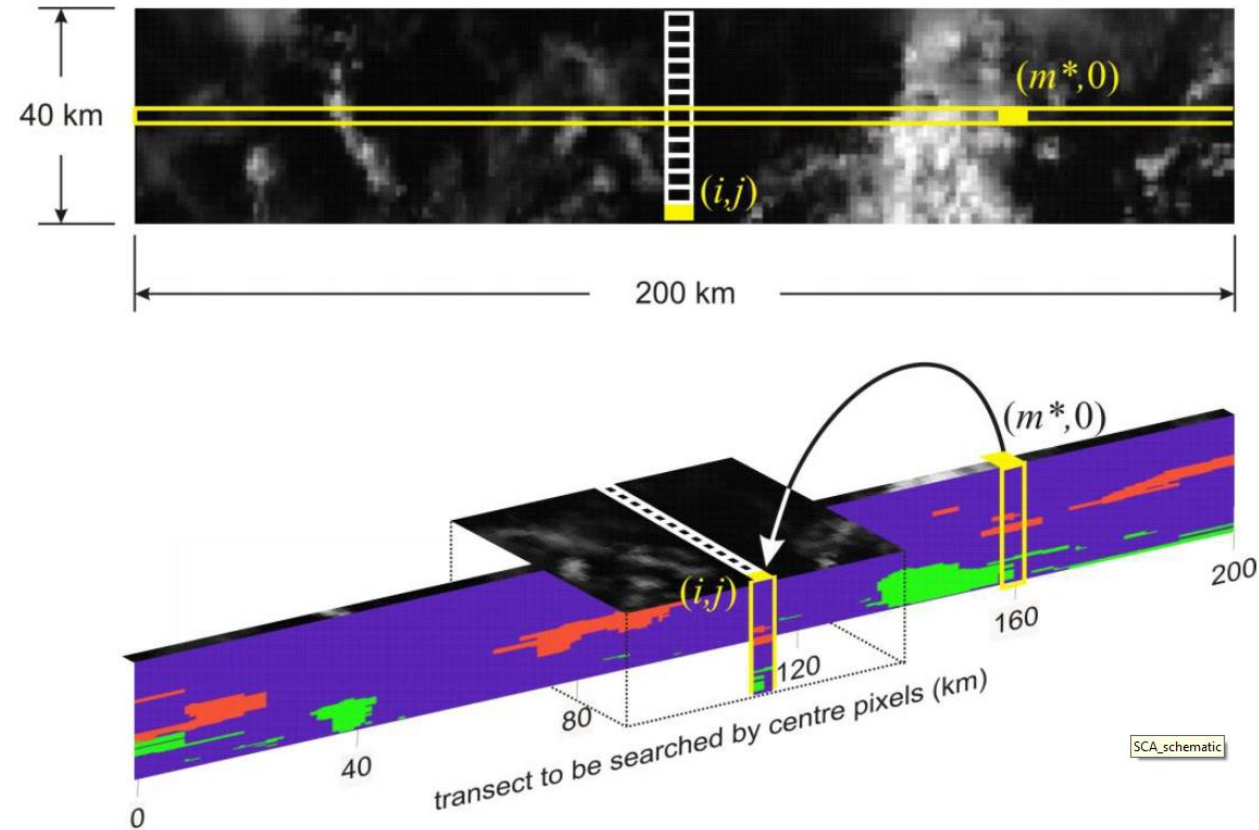

3D Scenes Construction

Expand syn. retrievals across-track using MSI; $\approx 40\text{km}$ wide

Radiative Transfer Products

calculated radiances, fluxes, heating rate profiles

Schematic of construction algorithm

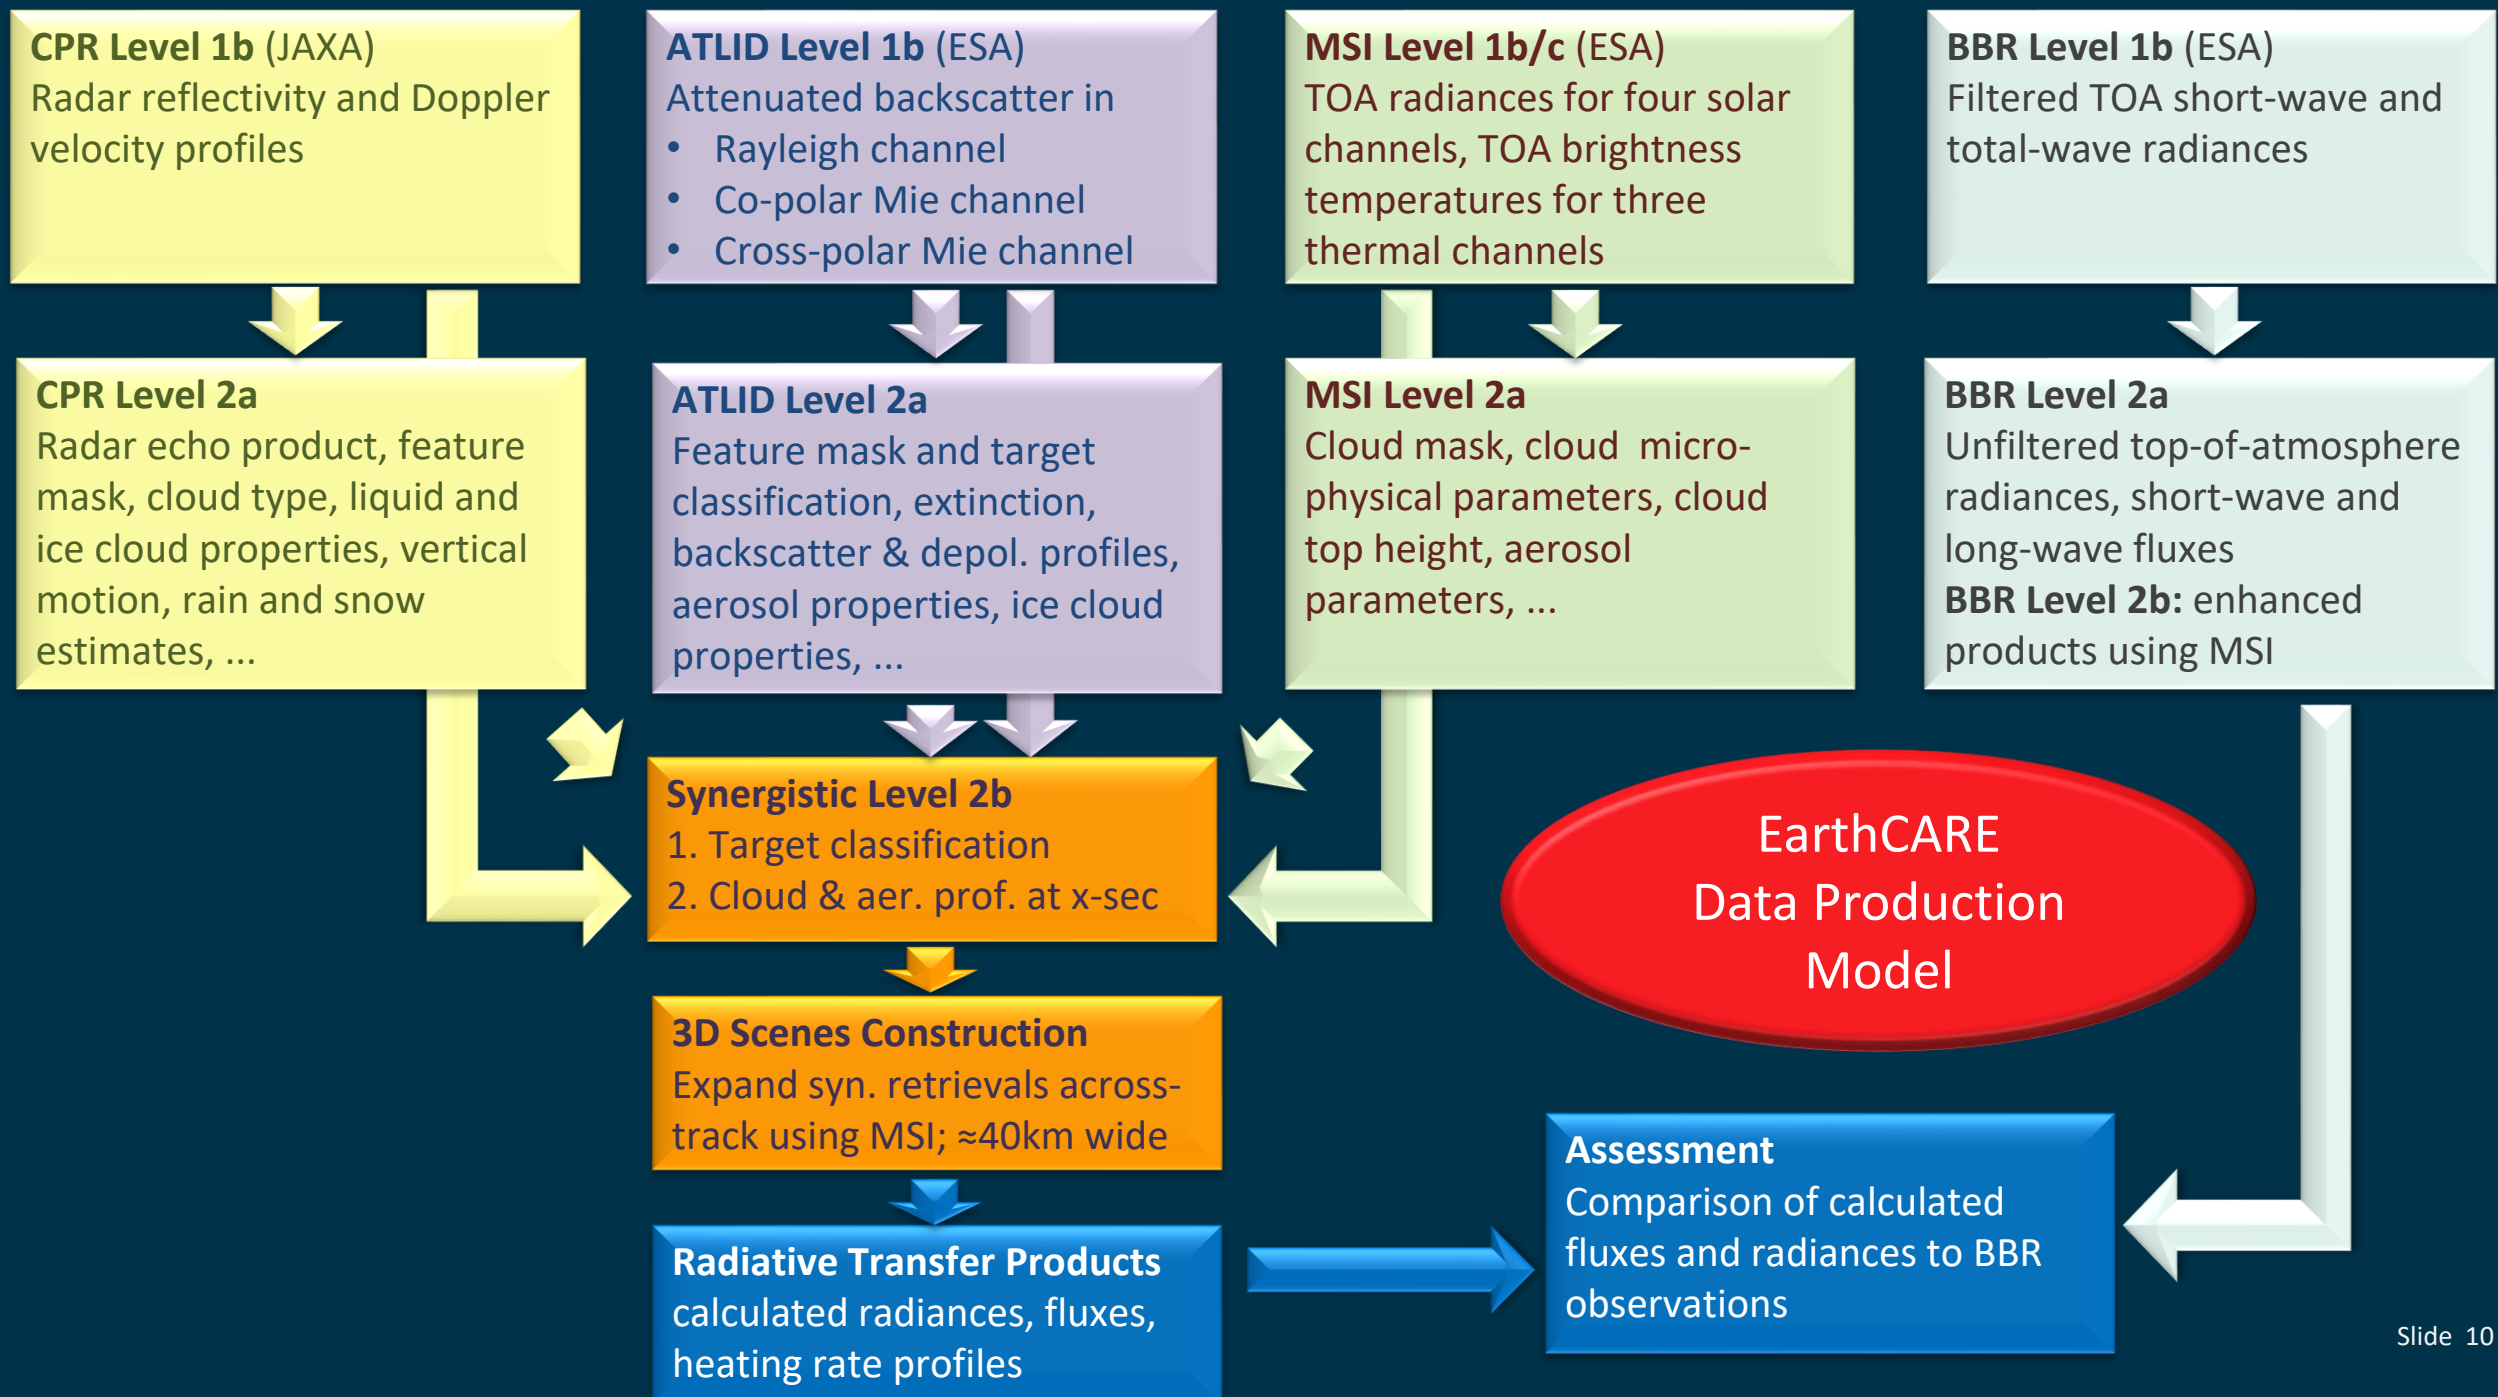

acknowledgements: Environment and Climate Change Canada

SOLAR FLUX

THERMAL FLUX

Retrievals and “Closure”

Example of work in progress

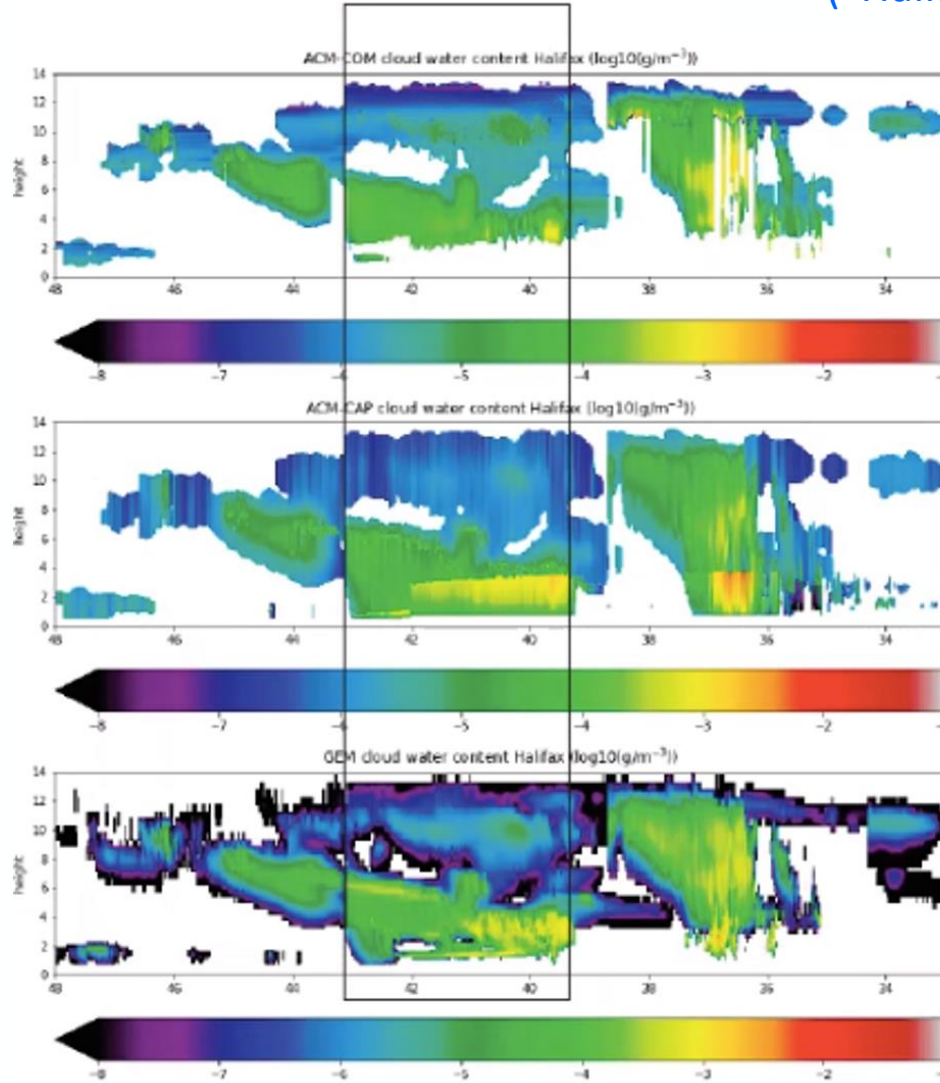

Reconstructed cloud scene
based on radar-only + lidar-
only + imager-only cloud
retrievals

(“Composite” product)
FLUX IN BLUE

Synergistically retrieved
cloud scene, CAPTIVATE
algorithm (Opt. Estimation
with complex state vector)
FLUX IN YELLOW

Model truth (Canadian Weather Model GEM)
FLUX IN RED

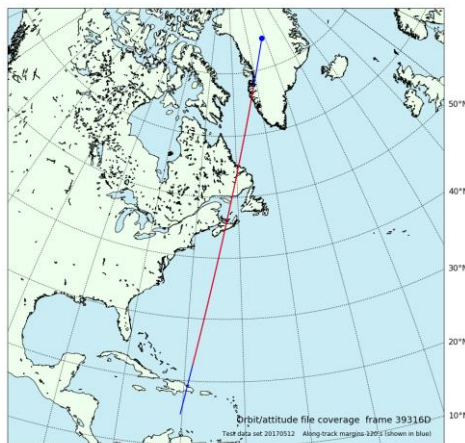

Cloud water content

Test Scene ("Halifax")

→ “Composite” clouds are too dull and too cold

However, recommended to wait for a few months until Level 1–Level 2 chain completed!

(some issues to be resolved, not yet chained with Level 2 processors in production model)

Level 2 **Algorithm Theoretical Basis Descriptions** to be published in *Atmospheric Measurement Techniques Special Issue on "EarthCARE Level 2 algorithms and data products"* → paper submission target is June 2022

Acknowledgments

The EarthCARE Joint Mission Advisory Group

Level 2 Team

➤ ATLID retrievals

G.-J. van Zadelhoff, D. Donovan (KNMI, Netherlands)

➤ CPR products

P. Kollias, B. Puigdomenech (McGill University, Canada); A. Battaglia (University of Torino, Italy)

➤ MSI retrievals

A. Hünerbein, S. Bley (TROPOS, Germany); N. Docter, R. Preusker, J. Fischer (Free University of Berlin, Germany)

➤ BBR radiances and estimated fluxes

N. Clerbaux, A. Velazquez, E. Baudrez (Royal Meteorological Institute Belgium); C. Domenech, R. Garcia Maranon (GMV Madrid), J. Fischer (Free University of Berlin, Germany)

➤ Synergistic ATLID & MSI retrievals

U. Wandinger, A. Hünerbein, M. Haarig (TROPOS, Germany)

➤ Synergistic CPR & ATLID & MSI retrievals

R. Hogan, S. Mason (ECMWF, UK); J. Delanoë, A. Irbah (LATMOS, France)

➤ Radiation products (from retrievals) & closure

H. Barker, J. Cole, M. Shephard, Z. Qu (Environment and Climate Change Canada); N. Villefranque (LMD/IPSL, France)

ECMWF Assimilation

M. Janiskova, M. Fielding
