

# Panel Discussion

## “Toward Future Precipitation Measurements in Asia”

- Coordinator:
  - Mr. Yusuke Muraki (JAXA, Japan)
- Panelists:
  - Prof. Nobuhiro Takahashi (Nagoya Univ., Japan)
  - Mr. Halimurrahman Kumuli (LAPAN, Indonesia)
  - Mr. Roy A. Badilla (PAGASA, Philippines)

# Objectives of the Panel

1. To introduce possible options for the future satellite precipitation measurements
2. To share expectations from users for the future satellite precipitation measurements
3. Discuss about the presented options and how to collaborate to realize better utilizations of satellite precipitation measurements in Asia

# Agenda

1. Introduction of options of the future satellite precipitation measurement missions
  - Prof. Takahashi
  - Mr. Muraki
2. Comments from Users
  - User expectation for future satellite precipitation measurement
  - How each country will contribute to the better utilization
  - Comments for the presented options
3. Open discussion with participants

# Presented Options

- Satellite systems
  - Advanced Precipitation Radar by Japan
  - Small Precipitation Radar Constellation by Asian Countries
  - Geostationary Precipitation Radar by Japan
- Regional cooperation to promote applications
  - Asian Satellite Water Information Center
- Introduction of systems to each country
  - ODA projects for water management issues
