

First Announcement

The 3rd SAFE Workshop on 16th-17th June 2011

Lao Plaza Hotel, Vientiane Capital, Lao PDR

You are cordially invited to attend the third Space Applications for Environment (SAFE) workshop co-organized by Water Resources and Environment Administration (WREA), Lao PDR and Japan Aerospace Exploration Agency (JAXA).

SAFE was launched by the Asia Pacific Regional Space Agency Forum (APRSAF) and it aims at establishing a prototype platform for development of solution (service) oriented application systems for climate change mitigation and adaptation by using space based earth observation technology. At this workshop, we will have reports of the on-going 8 prototyping projects endorsed by APRSAF and review possible new prototyping projects.

Further details of the workshop will be sending to you in due course. We are looking forward to seeing you at Vientiane.

With warmest regards,

Sincerely,
Bounneuang NOUTPATHONG
For Permanent Secretary
Water Resources and Environment Administration
